

Galaxyport Pro

A new dimension of protection against loss

Galaxyport Pro

A new dimension of protection

- > *Extended swivel arm sizes*
- > *Flexible access widths*
- > *Optimised anti-theft protection*

Minimise inventory shrinkage in the self-checkout area

Physical barrier for maximum security:

Our swivel arms offer an effective solution for minimising inventory shrinkage, especially in connection with partitions.

Thanks to their larger design, they prevent baskets from being slid under the swivel arms, making manipulation even more difficult.

Smart additions for added security:

With advanced technologies such as people tracking and camera systems, we cover the latest processes in the respective security area. With these processes we give customers the impression of a secure environment.

Goal: Effective loss prevention

Our system is specially designed to minimise inventory shrinkage and thus increase the profitability of the business.
