60 years of customer guidance systems

Benefit from Wanzl knowledge and expertise

CATALOGUE FROM 1966

For around 60 years, entry systems and turnstiles, customer guidance systems and barriers have been a focal point of the Wanzl product range. Wherever it is necessary to manage and monitor routes and to guarantee a seamless process, the innovative and high-quality products from Wanzl are in use.

PORTAMAT KL

Wanzl has applied a systematic approach to its customer guidance system portfolio. It contains all the components that modern stores require to guide and regulate customer flows, from the entrance to the checkout. Electronic and mechanical entrance systems for control at the entrances, guidance systems for directing the customers, protection systems for the store and furnishings, functional parts for staff, goods delivery and emergencies, elements for controlling the checkout area and the exits. They also comply with the highest safety requirements, for example in the event of emergencies or when used as anti-theft protection.

TECHNOPORT R®

The world is changing. Security requirements are increasing!

Wanzl employs around 4,600 people at eleven production sites around the world. working on new business areas and products, on exceptional product designs with a consistently high quality and a vast production depth. The result is a product that will extend Wanzl's success into the future: perfectly satisfied customers.

EGATE®

SELF-

INVITING AND FUNCTIONAL:
eGate

INVITING AND EYE-CATCHING:
ColourGate

At Wanzl, we know what people are looking for. They are looking for experiences – not least when shopping. What you are striving to do is to offer a diverse range of such experiences, so as to win and retain customers. Inviting entry solutions, low-key guidance systems and effective barriers from Wanzl will all help you achieve this goal.

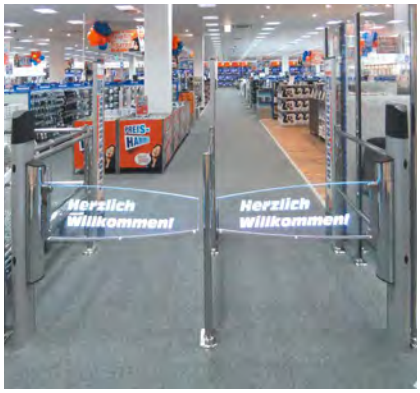
At Wanzl, highly-qualified employees are constantly working to develop solutions that make the processes within your company more effective, your store more inviting, orientation easier and the process of making a purchase faster and more reliable. The ability to avoid inventory differentials from the outset saves annoyance on both sides. The aim: perfectly satisfied customers.

Wanzl products are unique. Wanzl’s specialist expertise, consistency, reliability and innovative solutions and technologies ensure effective work processes along with the competitiveness and business success of its partners. Make the most of this opportunity and “show off your best side”.

Wanzl products are environmentally-friendly and sustainable. Even at the manufacturing stage, Wanzl takes care to use environmentally-friendly production techniques, coupled with environmentally-friendly and recyclable materials. The products are high quality and the measures implemented for upkeep, servicing and maintenance are worthwhile and help to keep the ongoing operating costs low for the long term.

The guidance your customers need

Reliable – from the entrance to the checkout



ELECTRONIC ENTRANCE SYSTEMS:
eGate Colour

PROTECTORS:
ProTec 3 bumper

CHECKOUT BARRIERS:
FS checkout barrier

Wanzl customer guidance systems accompany your customers throughout the entire store. Entrance systems that look as open and free of barriers as possible invite people to enter the store and make your customers feel welcome. Various designs of partitions open up paths and help to divide and structure your range. Effective protectors protect the shop fittings, the sensitive freezer units and sales counters, the shelves and tables, and help to preserve value. Barriers allow authorised persons to enter or exit whilst preventing unauthorised persons from passing through. Checkout barriers open up the exit at the checkouts. Exit gates ensure that the process runs smoothly in the checkout area or at modern payment terminals and reduce inventory differentials.

Wanzl products deliver reliable functionality. The best material and finish quality, outstanding processing of all components and decades of experience in design, planning, production and installation make Wanzl the ideal partner for every aspect of guiding and directing customers and visitors. In many areas, Wanzl systems have been providing reliable service for many years.

Safety as you need it

You know the situation. Wanzl has the solution.

OPEN GUIDANCE:
Classic customer guidance systems

PREVENTATIVE ANTI-THEFT PROTECTION:
Railix Design

OPTIMUM PROTECTION AGAINST INVENTORY LOSSES:
eGate double system, double-gate

Diverse solutions from Wanzl. The requirements regarding safety standards to be met by stores differ greatly across the regions. “Rural area” and “inner city” only characterise the requirements very roughly.
You are aware of the situation in your store and know what is necessary. The equipment of the components and/or of the system is selected in line with the requirements.
High swivel barriers offer more protection, partitions can completely prevent people reaching through them, and visual and acoustic alarms that are triggered in the event of manipulation of electronic entrance systems can protect against inventory differentials.

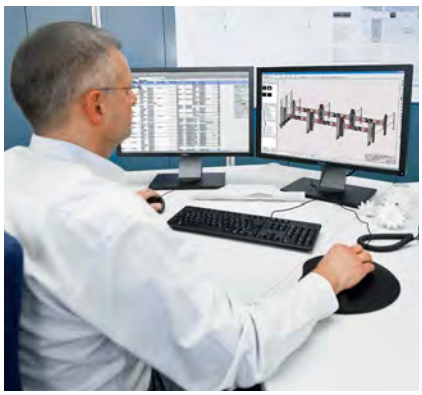
The right protection for every aspect – and if a gap is discovered in spite of this, Wanzl components are compatible and replaceable, and can be adapted at any time.

Wanzl products are reliable. Wanzl offers exactly the right solution for the various safety requirements, ranging from open-space solutions through to highly effective devices to prevent theft from stores situated in difficult areas. Take advantage of our knowledge and expertise.

Project planning, with a great deal of experience and expertise

Guiding customers – tactfully and almost unnoticeably

COMPETENT ADVICE:
on site or at our exhibit in the CreativeCenter



PROFESSIONAL PLANNING:
using modern CAD systems

3D IMAGES:
clearly show you how to use the device

■ **Expert advice.** Contact us in the first instance. We can provide you with support and advice, even while you are considering a new project. With our many years of experience, we will be happy to help you to approach your construction project in the best possible way and avoid any problems. The objective: The less customers are aware that they are being steered, the more likely they are to return. An effective guidance system does not create barriers, but instead leads the way in the optimum manner.

■ **State-of-the-art 3D planning.** We create precise schematic drawings using modern, computer-based CAD systems. At every stage of the process, 3D depictions can be used to provide you with information on how the space will be used. The plans are discussed and finely tuned in detail, taking all the structural conditions into account.

■ **Wanzl - your partner from the brief to completion.** With a multitude of products making up our customer guidance range, and many years of experience, we will support you in realising your construction project, all the way from initial contact through to field assembly and installation. You will be won over by our format ideas and professional project service.

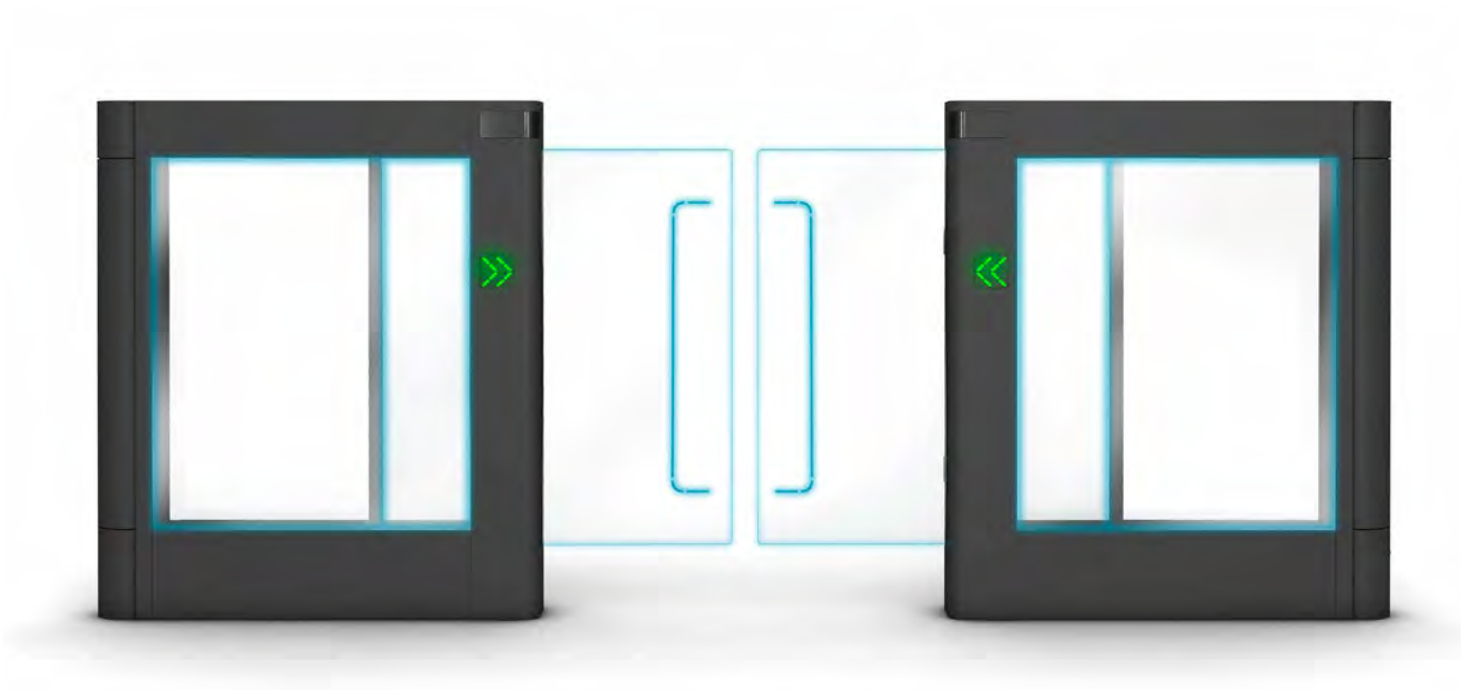
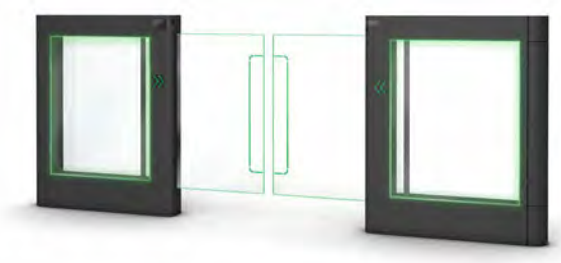
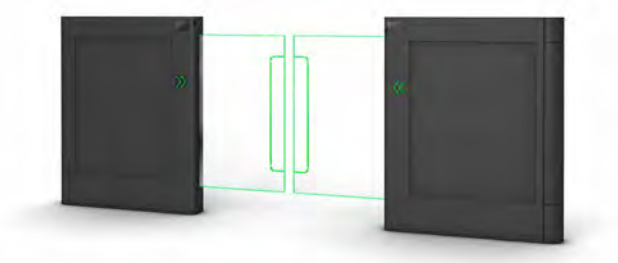
- ***› State-of-the-art electronics for infrastructure security***



SLIDINGDOOR DESIGN COLOUR
with 900 mm passage width



SLIDINGDOOR DESIGN COLOUR with transparent toughened safety glass



SLIDINGDOOR BASIC COLOUR with closed metal body

01.01 SlidingDoor

The automatic SlidingDoor ensures a convenient, safe and barrier-free entrance and exit in the space concept of your retail space, fitness studio or company entrance area. Space-saving and visually appealing, it blends into any architecture.

State-of-the-art drive technology ensures maximum reliability. Thanks to different passage widths, the SlidingDoor adapts perfectly to different space concepts.

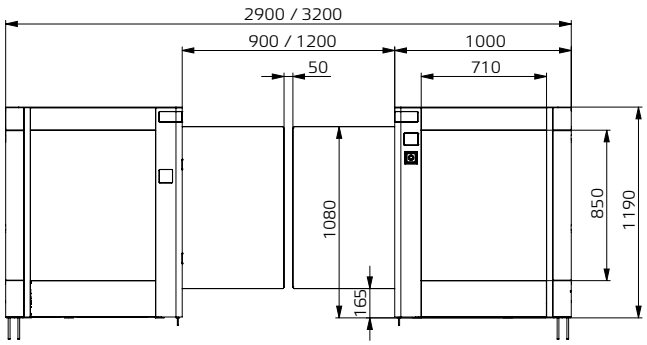
Design

Aluminium powder-coated cover housing. Door leaf and side windows made of toughened safety glass. Based on the latest technology for intelligent system control and management.

Standard technical equipment

- LED operating status display
- Door leaf tampering alarm
- Travel path monitoring

Scale drawing



Elegance in colour

Four attractive standard colours are available for the cover housing. Other colours available on request.

9160 – Iron mica

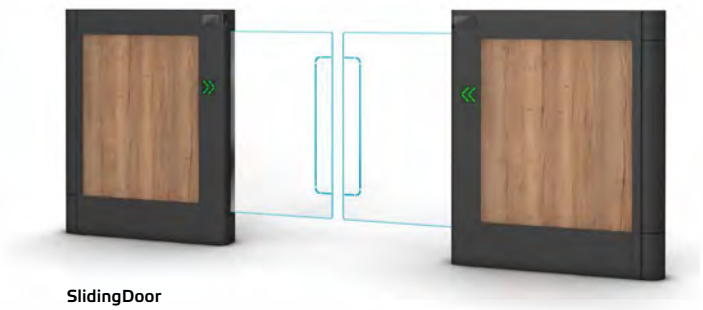
7024 – Graphite grey

7097 – Metallic black

9016 – Traffic white

Unlimited adaptation options

The SlidingDoor Basic can be customised with magnetic decals or advertising.



SlidingDoor

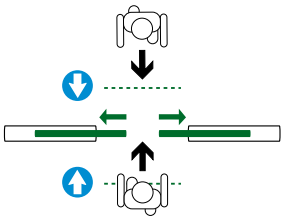
SlidingDoor
with advertising
(advertising space 700 x 845 mm)

01.01 SlidingDoor – Technical information

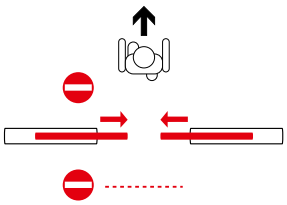
Functions

After release, the door leaves open in the direction of passage. Once the user has passed through the system, the door leaves close fully again. The integrated sensors monitor passage when the doors are open and when they are closed. Attempted manipulation and unauthorised access are prevented and trigger an alarm.

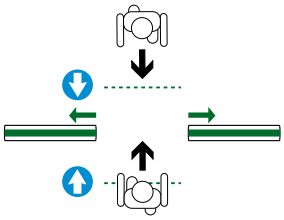


Two-directional operation
The SlidingDoor allows for passage from two directions.
If people from both directions would like to pass through simultaneously, the first person to activate the reader unit for opening takes precedence.

Sensors
Radars and light barriers are used to realise the opening or reverse detection alarm in real time or to continuously check the travel path of the door leaves.



Single opening (optional with control panel)
After the opening pulse, the SlidingDoor leaves close again completely and the system is in normal operation.



Permanent opening (optional with control panel)
The door leaves of the SlidingDoor remain open and only close after permanent opening is deactivated. The system then returns to normal operation.

SlidingDoor
open

Operating status indicator

Visual signalling
Integrated LED strips signal the operating status of the SlidingDoor in the entry and exit direction.

Audible signalling
The alarm alerts tampering of any kind and voice prompts support correct use.

LED status indicator*		
	Door leaf	Side glass**
Open	Green	Green

23.08120.73-9160	23.08100.73-9160

Standard equipment

Travel path monitoring

The travel path monitoring function protects persons, and especially children, from possible injuries. Light barriers detect obstacles in the travel path and stop the door leaf from moving.

Door leaf tampering alarm

If one of the door leaves is pushed to the side, held in place or its movement is influenced, a visual and audible alarm is emitted. The door leaves then immediately and automatically return to the closed position.

Fire alarm system

The NC contact can be connected to the central fire alarm system (BMZ).

Accessories

Power supply from the ceiling

230 V supply line and signal line from the ceiling mean that no structural work is necessary and simplify alterations.

Radio remote control

Remote control of one or more systems. Release in the direction of passage, exit direction or set to permanently open.

Open switch

After activation, the door leaves open automatically and a visual and audible alarm is emitted. The door leaves return to the closed position after manual operation of the switch.

Control panel

Passage release for one person using a button, set to permanently open with switch and passage of staff in the opposite direction using a button.

Reverse detection alarm

The direction-sensing radar triggers an acoustic alarm or a voice announcement.

LED moving light

The moving light on the top of the housing also lights up in the respective operating status colour.

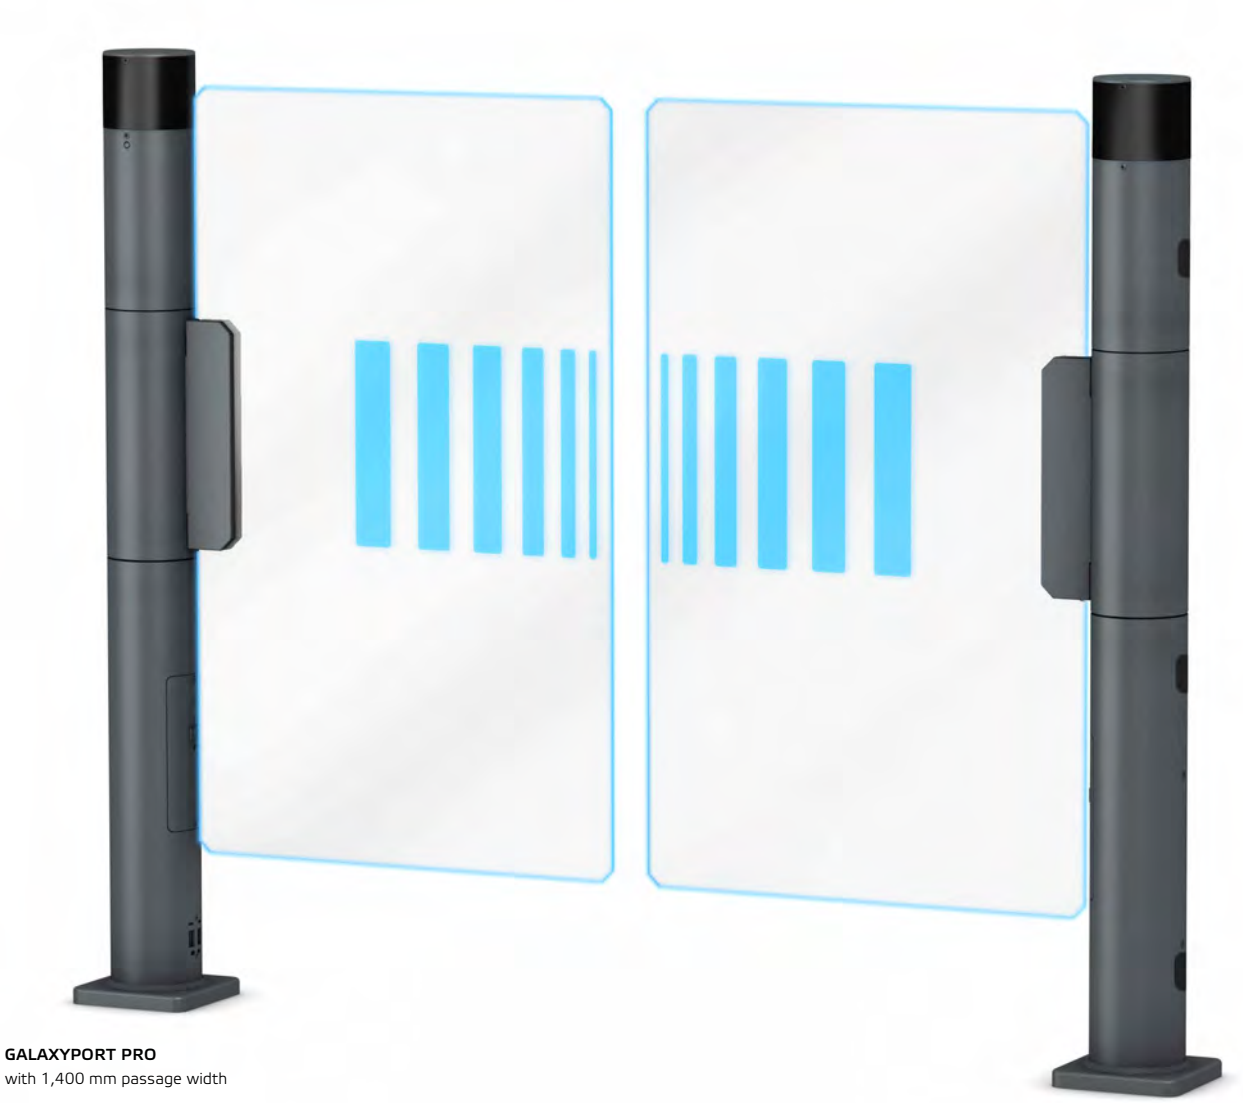
Wanzl connect®

Dashboard for an overview of all entry systems and their operating status and relevant opening information.

01.02 Galaxyport Pro

A new dimension of protection

- ***› Extended swivel arm sizes***
- ***› Flexible access widths***
- ***› Optimised anti-theft protection***



GALAXYPORT PRO
with 1,400 mm passage width

GALAXYPORT PRO with customer guidance elements

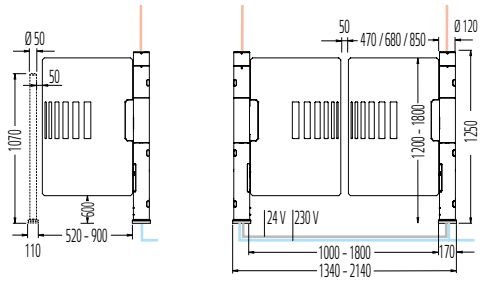
GALAXYPORT PRO with 1,750 mm passage width

GALAXYPORT PRO with an overall height of 1,800 mm

01.02 Galaxyport Pro

Design

Steel tubing upright, coloured plastic powder-coated finish. Swivel arm made of standard safety glass with polished edges and LED lighting. Pivot mechanism made of metal, fully integrated in the upright – provides a particularly high level of injury protection. Galaxyport Pro entry systems are equipped with a radar control as a standard feature.



Elegance in colour

Upright coating available in four attractive colours.

9160	7024	7016	7097
Metallic grey	Graphite grey	Metallic black	Anthracite grey

Anti-panic features

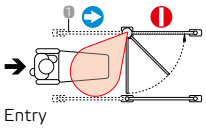
- In an emergency, the barrier can be opened in both directions. An acoustic alarm indicates that the barrier has been opened and protects against misuse.
- The automatic barrier reset ensures that the system is ready for operation once again.

Standard technical equipment

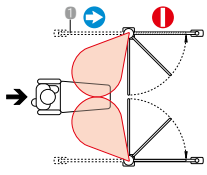
- LED lighting.
- Galaxyport Pro systems comply with both national and international safety requirements.
- Even opening of the swivel arms.
- Synchronised opening of the swivel arm in all double systems without a central divider.
- Infinitely variable opening angle from 0º – 180º. Precise adjustment using the teach-in procedure.
- Freely programmable opening time, after which the system closes again automatically.
- Adjustment of the opening direction possible on-site.
- Panic alarm
- Barrier manipulation alarm

Radar control – System examples

Individual systems
Radar control

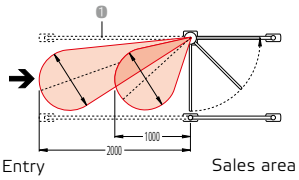


Double systems
Radar control of both uprights



Adjustable radar beam

Flexible adaptation of the radar beam for optimum customer registration and to suit the space available from 0.5 up to a maximum of 2.5 m.



Combination with customer guidance elements

Optional customer guidance elements can be mounted directly on the Galaxyport Pro upright using an adapter.

LED lighting

The standard version of the Galaxyport Pro has blue lighting in the basic position. The lighting changes to red if an alarm is triggered. A customised colour scheme is available on request.

Original position: Blue (default)

Opening mode: Green

In the event of an alarm: Red

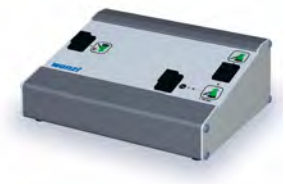
01.02 Galaxyport Pro – Configurable equipment

Power supply from the ceiling

230 V feed line and signal line from the ceiling mean that no structural work is necessary and simplify alterations.

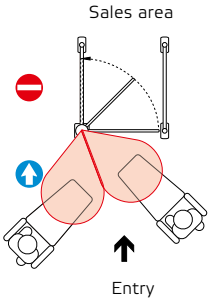
Control panel

Passage release for one person using a button, set to permanently open with switch and passage of staff in the opposite direction using a button.



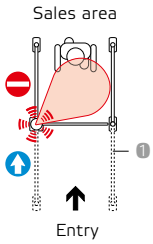
Tandem radar

For narrow and problematic entry zones.
The second radar detects customers who approach from an acute angle. Both radar beams can be adjusted individually to suit the relevant situation. A second radar module can also be retrofitted.



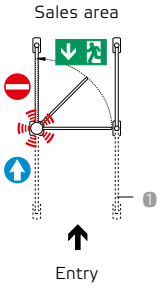
Reverse detection alarm

The direction-sensing radar triggers an acoustic alarm or a voice output.



Fire alarm system

Galaxyport Pro systems can be integrated into the facility management system.
In emergencies, an acoustic alarm is triggered at the entry barrier and warns the staff and the customers. The swivel arm opens automatically in the direction of the exit and so opens up an emergency exit.

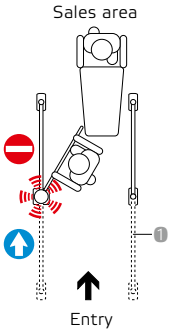


Radio remote control

Remote control of one or more systems. Release in the direction of passage, exit direction or set to permanently open.

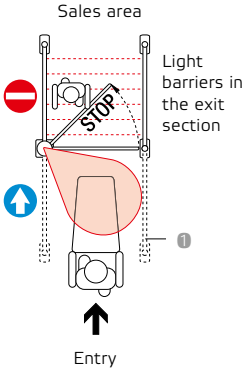
Barrier tampering alarm fitted as standard

If the barrier is deliberately manipulated during the closing process, an acoustic alarm is triggered.



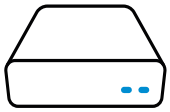
Swivel range monitoring

The “barrier stop” swivel range monitoring protects persons, and especially children, from possible injuries.
In the exit section, integrated light barriers detect obstacles in the swinging area and stop the movement of the swivel arm.



Mini-PC

To control entry systems via a network. Activation of the entry system from a stationary PC or on the move with a tablet PC or smartphone.



Wanzl connect®

Dashboard for an overview of all entry systems and their operating status and relevant opening information.

01.02 eGate® Colour

A particularly friendly welcome

- ***Friendly customer reception with LED lighting***
- ***Inviting route guidance in a modern design***
- ***Customisation with own logo or lettering available***

DOUBLE SYSTEM
Swivel arm in ES glass

SINGLE SYSTEM, DOUBLE-GATE
Opening to the left

DOUBLE SYSTEM, DOUBLE-GATE WITH ENTRY SECTION
Opening in both directions

DOUBLE SYSTEM, DOUBLE-GATE
With central divider, opening to the left or right

01.02 eGate® Colour

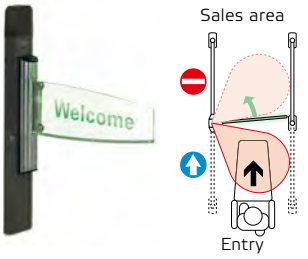
eGate® Colour makes customers feel very welcome as soon as they reach the entrance area. Innovative LED lighting clearly indicates the route and invites customers to enter the store.

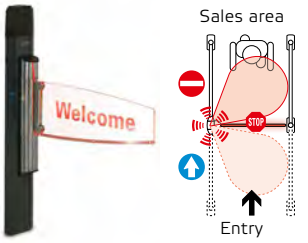
Attractive eyecatcher

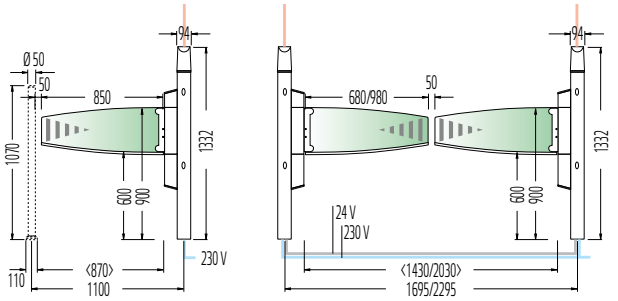
Thanks to the range of colour options available, the upright of the attractive high-tech entrance system matches the store's corporate design and, with the illuminated swivel arm, encourages customers to enter, with the 'barrier-effect' greatly reduced. The barrier effect is greatly reduced.

Function

The swivel arm, lit up in **green**, unmistakeably shows customers the route into the store.
Unauthorised exit from the store is prevented by the exit alarm. The light on the swivel arm changes to **red**. For a more detailed description of operation, please refer to the “eGate” section on page 23.







Anti-panic features

- In an emergency, the barrier can be opened in both directions. An acoustic alarm indicates that the barrier has been opened and protects against misuse.
- The automatic barrier reset ensures that the system is ready for operation once again.

Standard technical equipment

- Max. operating voltage of 24 V DC for the highest levels of safety.
- eGate systems comply with both national and international safety requirements.
- Even opening of the swivel arms. No swing back. Best positioning globally.
- Synchronised opening of the swivel arm in all double systems without a central divider.
- Infinitely variable opening angle from 0º – 180º. Precise adjustment using the teach-in procedure.
- Freely programmable opening time, after which the system closes again automatically.
- Adjustment of the opening direction possible on-site.
- Electronically adjustable panic force.

Swivel arm

Glass swivel arm as standard. Safety glass with polished edges, LED lighting and directional arrows.

Unique design

In addition to the standard designs, the illuminated swivel arm can also be personalised with your store name or logo on request.

DOUBLE SYSTEM, DOUBLE-GATE WITH ENTRY SECTION
Promotion swivel barrier, opening in both directions

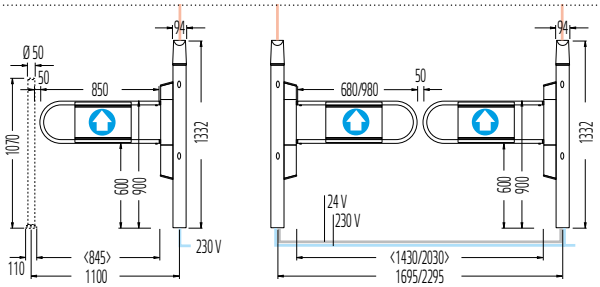
3 SINGLE SYSTEMS
Classic swivel barrier, opening to the left

01.03 eGate®

eGate entrance systems. Cutting-edge technology with many functions for guiding streams of customers. The highest standard of safety and security to protect customers and to guard against inventory differentials.

Design

Aluminium upright, coloured plastic powder-coated finish*. Housing for pivot mechanism and Classic swivel barrier with high-gloss chrome plating, coloured plastic powder-coated finish* or in stainless steel. Info sign made of white plastic or transparent acrylic glass, printed on both sides.

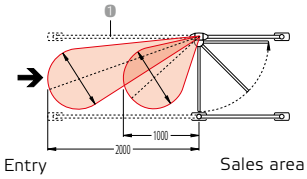


Function

eGate entrance systems are equipped with a radar control as a standard feature. In the case of two-way systems, the second system is controlled by an infrared light barrier. The radar control saves space, as in most cases it is possible to dispense with an entry section ❶.

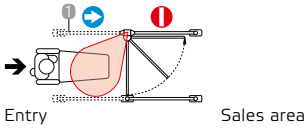
Adjustable radar beam

The range can be set to suit the space available and the opening time can be adjusted from 0.5 up to a maximum of 2.5 m.



Radar control – System examples

Individual systems
Radar control



Double systems

01.03 eGate®– Configurable equipment

Power supply from the ceiling

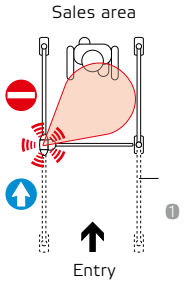
230 V feed line and signal line from the ceiling mean that no structural work is necessary and simplify alterations.

Control panel

Passage release for one person using a button, set to permanently open with switch and passage of staff in the opposite direction using a button.

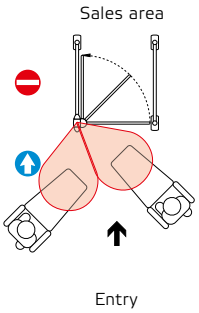
Reverse detection alarm

The direction-sensing radar triggers an acoustic alarm or a voice announcement.



Tandem radar

For narrow and problematic entry zones.
The second radar detects customers who approach from an acute angle. Both radar beams can be adjusted individually to suit the relevant situation. A second radar module can also be retrofitted.

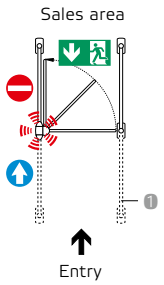


Fire alarm system

eGate systems can be integrated into the facility management system. In emergencies, the swivel barrier opens automatically in the direction of the exit.

For close or open contact

Note: If fire alarm systems are to be connected with normally closed contact, no control panel, button, remote control can be connected for the opening.

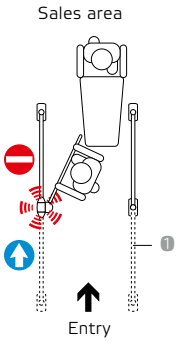


Radio remote control

Remote control of one or more systems. Release in the direction of passage, exit direction or set to permanently open.

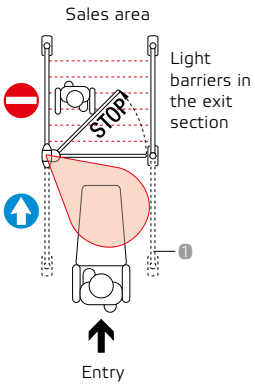
Barrier manipulation alarm

If the barrier is deliberately manipulated during the closing process, an acoustic alarm is triggered.



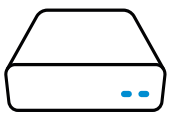
Swivel range monitoring

The swivel range monitoring protects persons, and especially children, from possible injuries.
In the exit section, integrated light barriers detect obstacles in the swinging area and stop the movement of the swivel arm.



Mini-PC

To control entry systems via a network. Activation of the entry system from a stationary PC or on the move with a tablet PC or smartphone.

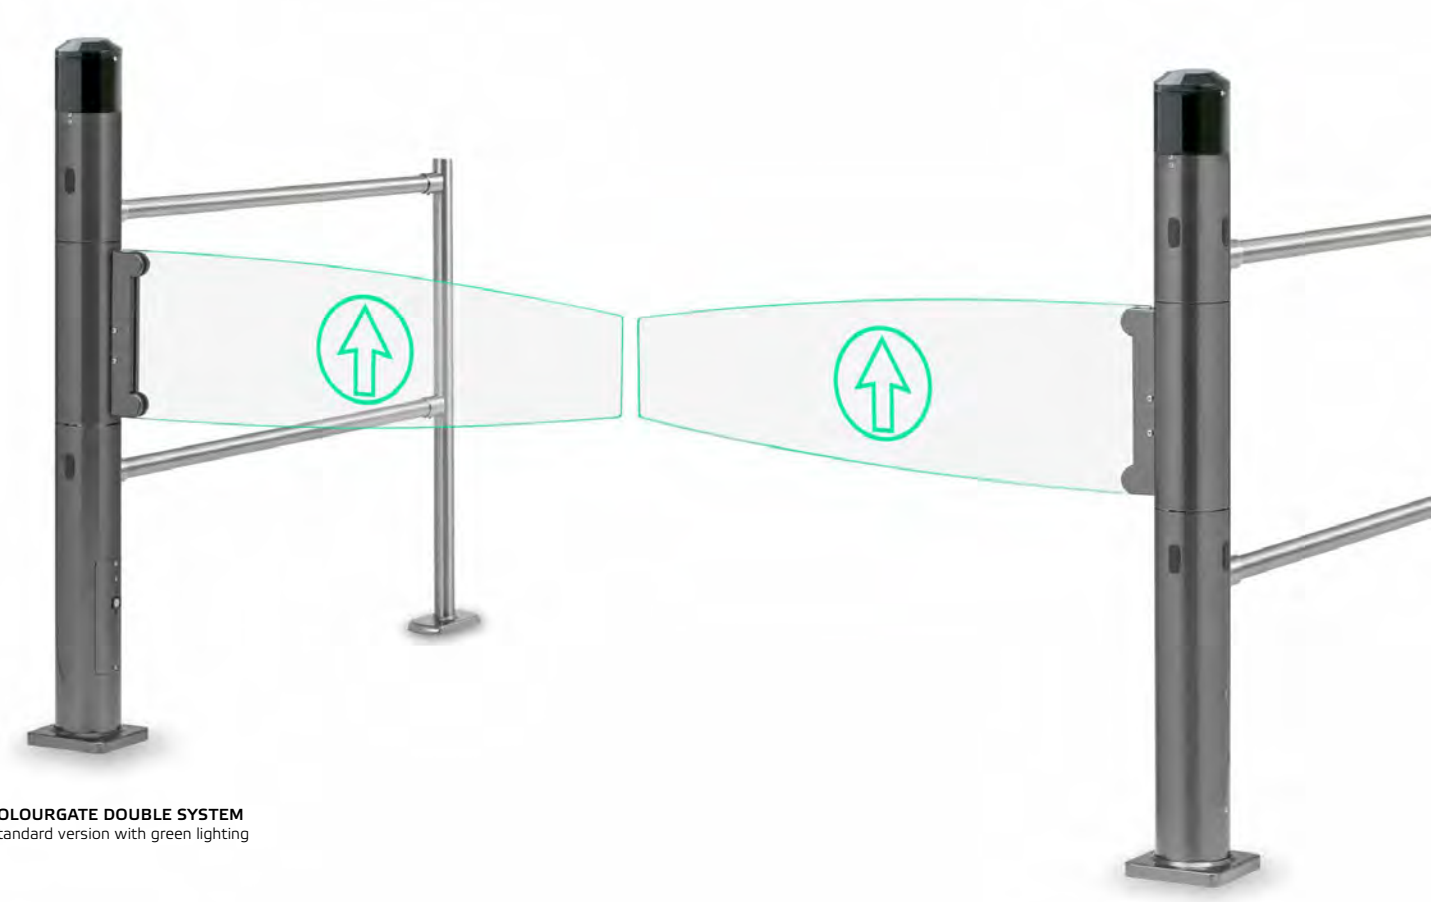


1 Entry section on request

01.04 ColourGate

An electronic entry system with LED lighting

- ***> Friendly customer reception in the entrance area***
- ***> High level of protection against inventory shrinkage***
- ***> Barrier-free access and safety in case of an emergency***



COLOURGATE DOUBLE SYSTEM
Standard version with green lighting

ColourGate entry systems by Wanzl are visual highlights in your store. The integrated LED lighting shows customers the way into the store in a friendly manner. Improper behaviour in the entrance area is indicated not only acoustically but also visually. This effectively reduces inventory discrepancies.

SINGLE SYSTEM, DOUBLE-GATE WITH ENTRY SECTION
Promotion swivel barrier, opening to the left

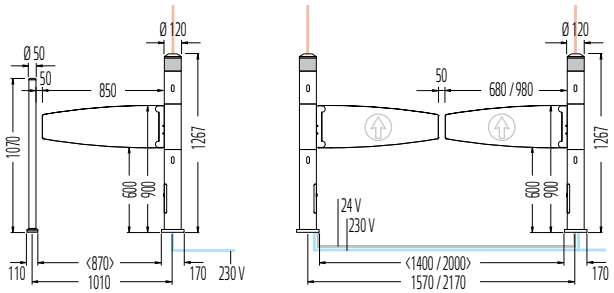
DOUBLE SYSTEM, DOUBLE-GATE, WITH CENTRAL DIVIDER
Classic swivel barrier, opening to the left or right

3 SINGLE SYSTEMS, DOUBLE-GATE
Classic swivel barrier, opening to the left

01.04 ColourGate

Design

Upright made of steel tubing, high-gloss chrome-plated or with coloured plastic powder coating. Swivel arm made of standard safety glass with polished edges, LED lighting and directional arrow. Pivot mechanism made of metal, fully integrated in the upright – provides a particularly high level of injury protection.



Function

ColourGate entrance systems are equipped with a radar control as a standard feature. In the case of two-way systems, the second system is controlled by a light barrier. The radar control saves space, as in most cases it is possible to go without an entry section ❶.

Anti-panic features

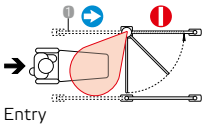
- In an emergency, the barrier can be opened in both directions. An acoustic alarm indicates that the barrier has been opened and protects against misuse.
- The automatic barrier reset ensures that the system is ready for operation once again.

Standard technical equipment

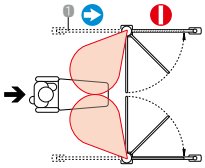
- LED lighting.
- ColourGate systems comply with both national and international safety requirements.
- Even opening of the swivel arms.
- Synchronised opening of the swivel arm in all double systems without a central divider.
- Infinitely variable opening angle from 0°–180°. Precise adjustment using the teach-in procedure.
- Freely programmable opening time, after which the system closes again automatically.
- Adjustment of the opening direction possible on-site.
- Panic alarm
- Barrier manipulation alarm

Radar control – System examples

Single systems
With radar control

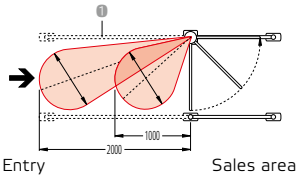


Double systems
Radar control of both uprights



Adjustable radar beam

Flexible adaptation of the radar beam for optimum customer registration and to suit the space available from 0.5 up to a maximum of 2.5 m.



Unique design

The swivel arms can be individually designed on request.

LED lighting

The standard version of the ColourGate has green lighting in the basic position. The lighting changes to red if an alarm is triggered.
A customised colour scheme is available on request.

Original position: Green (standard) | In the event of an alarm: Red | Customised colour scheme: e.g. blue

01.07 Safety turnstiles

The classic entrance solution

- ***With double anti-panic feature as standard***
- ***Pivots out, e.g. for pallet passage***
- ***Certified safety "GS"***

SINGLE TURNSTILE SYSTEM
Safety turnstile with passage for shopping trolleys

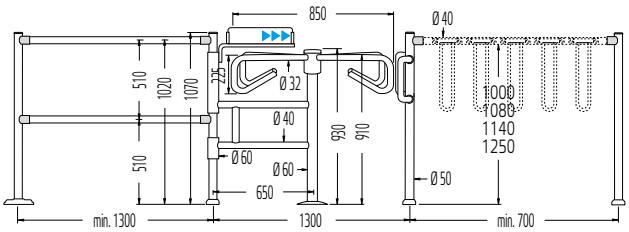
ALARMING SYSTEM
Acoustic, reduces shoplifting – available on request.

01.07 Safety turnstiles

Wanzl safety turnstiles are a secure and safe investment. Secure because they help to reduce inventory differences effectively and safe because the double anti-panic feature ensures effective protection for your customers.

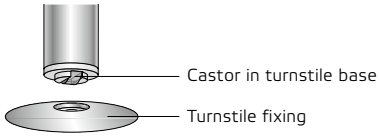
Design

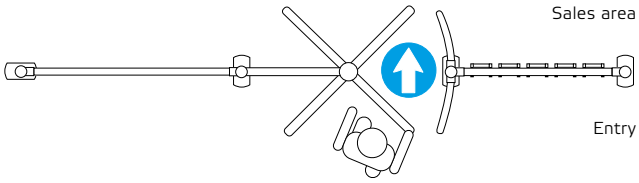
Turnstile made of steel tubing that can be pivoted out, complete with Classic customer guidance system and bases to allow shopping trolleys to pass through*. Design offering reliable operation with double anti-panic feature. Surfaces: high-gloss chrome-plated, coloured plastic powder-coated* or stainless steel.

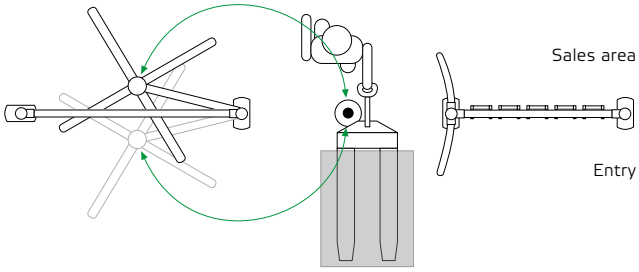


Function

The turnstile is activated manually, the direction of rotation can be switched on-site. To allow pallets to pass through, the turnstile is lifted up from the turnstile fixing and pivoted out. The castor integrated in the turnstile base prevents damage to the floor.

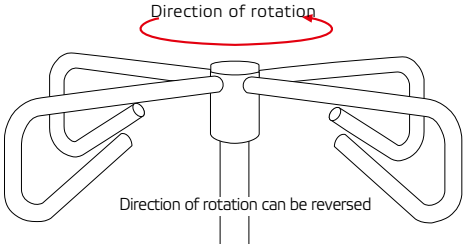




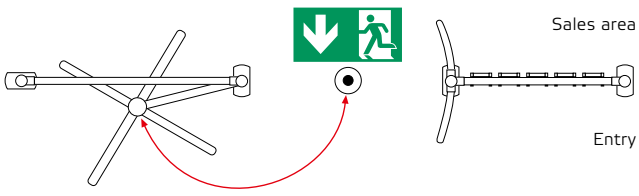


Double anti-panic feature

Anti-panic feature 1: With a certain amount of counter-pressure, the safety turnstile's direction of rotation can be reversed. This prevents injury to any persons who may be jammed in the turnstile. After rotating through 90º, the turnstile engages again.



Anti-panic feature 2: With strong counter-pressure, the safety turnstile releases from the turnstile fixing without being raised and pivots in the direction of the exit.
An emergency exit measuring a maximum of 1,250 mm is opened.



*Connecting tube and locking barrier for passage of shopping trolleys to be ordered separately, colours available on request.

in combination with eGate system and Classic customer guidance system

01.08 Swing gates

Wanzl swing gates are characterised by a high level of workmanship, sophisticated and reliable engineering and the fact that they do not require any maintenance during long-term use.

Design

Base, swivel tube and steel tube swivel barrier. Finishes: high-gloss chrome-plated or coloured plastic powder coating*. Integrated, hydraulically-cushioned locking device to ensure that the barrier pivots back into position evenly. Anti-panic feature as standard. Info sign made of plastic, white, printed on both sides in the case of mechanical swing gates.

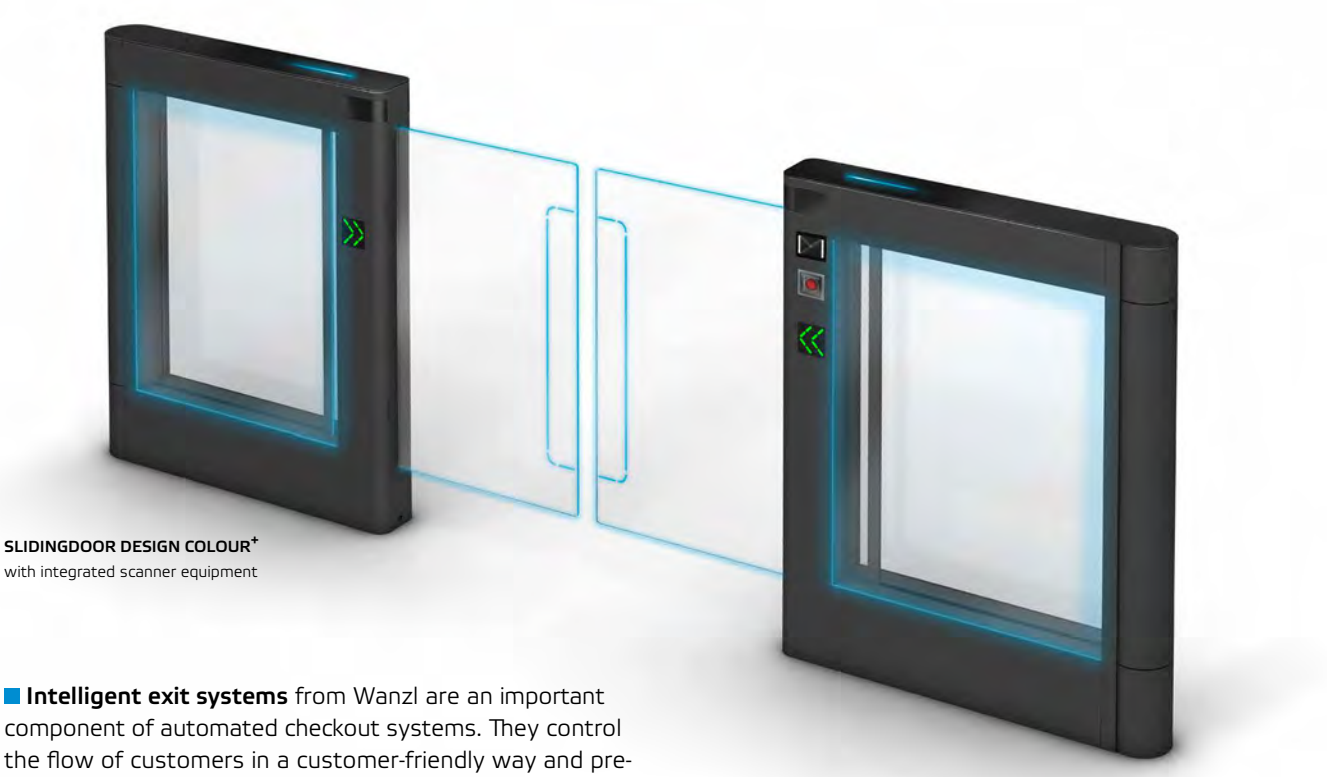
Elegant and space-saving exits

- ***› Controlled exit from the store after payment***
- ***› Aesthetic design that fits seamlessly into any interior concept***
- ***› Customisation: Design according to your preferences and corporate design***



SLIDINGDOOR DESIGN COLOUR+
with integrated scanner equipment

Intelligent exit systems from Wanzl are an important component of automated checkout systems. They control the flow of customers in a customer-friendly way and prevent inventory differentials.

Design

Aluminium powder-coated cover housing. Four standard colours to choose from: Iron mica, graphite grey, metallic black, white. Door leaf and side windows made of toughened safety glass. Includes barcode reader for controlled checkout.

Scale drawing

02.02 ExitGates

For a secure exit from self-checkout zones

- ***Controlled exit from the store after payment***
- ***Three different versions: as eGate Colour, eGate or Technoport***
- ***Optional additional functions, such as customer traffic measurement***

GALAXYPORT PRO DOUBLE SYSTEM
Exit system with scanner upright, partition and customer guidance system

EGATE COLOUR DOUBLE SYSTEM
Toughened safety glass swivel barrier, with exit section

Customer-friendly

Using the integrated sensor, the ExitGate detects the current situation (slow or fast-moving people, customers with children, etc.). The barriers remain open as long as necessary, but not one second more – for great customer friendliness with maximum security

Flexible software

Wanzl ExitGates are adapted to the requirements of the checkout processes by means of the software. Subsequent changes and adjustments are also possible thanks to an update function integrated in the software.

Anti-panic feature as standard

In an emergency, the integrated anti-panic function allows the barriers to be opened towards the exit both manually and automatically (e.g. via a signal from the building control system). Additionally, on request, individual voice announcements or alarm signals are possible.

Automatic and secure

The automatic barrier return prevents inventory differentials. After the barrier has been opened manually, the Exit Gate immediately restores the “working situation”. Staff are not required to reset the barriers, unlike in traditional systems.

Design

Galaxyport Pro system: Steel tubing upright, coloured plastic powder-coated finish. Swivel arm made of standard safety glass with polished edges and LED lighting.

Technoport system: Upright and Classic swivel barrier made of steel tubing, high-gloss chrome-plated or coloured plastic powder coating*. Pivot mechanism made of metal, fully integrated in the upright – provides a particularly high level of injury protection. Info sign made of white plastic or transparent acrylic.

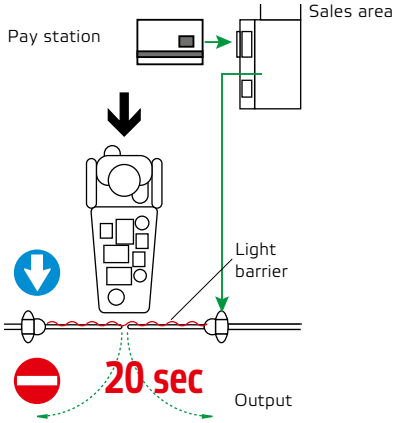
eGate system: Aluminium column, coloured plastic powder-coated finish*. Housing for pivot mechanism and Classic swivel barrier with high-gloss chrome plating, coloured plastic powder-coated finish* or in stainless steel. Info sign made of white plastic or transparent acrylic.

eGate Colour system: Design as above only with colour-illuminated swivel arm made of single-pane safety glass.

* Different colours available upon request.

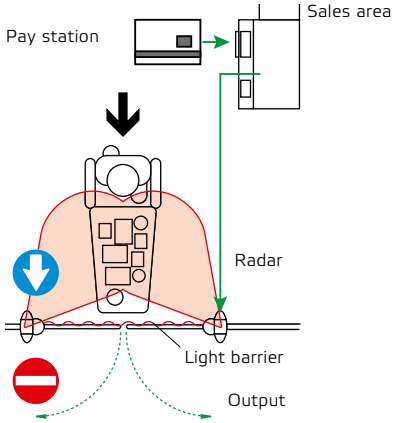
02.01 ExitGates

Function – System examples



Opening with pre-set time

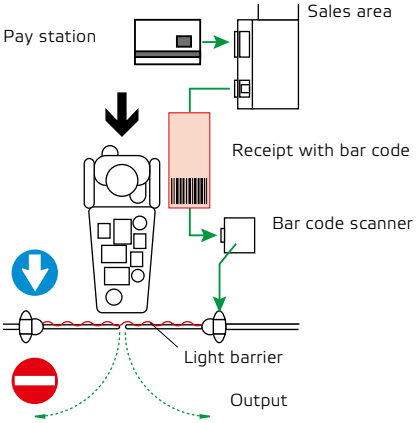
- The customer pays for the goods at the payment machine
- The payment machine sends an opening pulse to the ExitGate
- The ExitGate opens for a pre-set time (e.g. 20 seconds)
- Once the customer has passed through the light barrier, the ExitGate closes after a pre-set time (e.g. 2 seconds)



Opening by radar

- The customer pays for the goods at the payment machine
- The payment machine sends an opening pulse to the ExitGate
- The ExitGate opens when the customer is detected by the radar, for a pre-set time (e.g. 20 seconds)
- Once the customer has passed through the light barrier, the ExitGate closes after a pre-set time (e.g. 2 seconds)

With the eGate Colour ExitGate system, the swivel arms glow red. After payment, the lighting switches to green. The swivel arms open if the customer is detected by the radar.

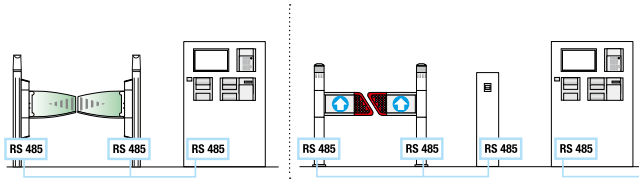


Opening with a bar code

- The customer pays for the goods at the payment machine
- The payment machine issues a receipt with a barcode
- The ExitGate opens after scanning the bar code on the receipt reader for a pre-set time

Computer-based control

Modern microprocessor hardware combined with special software controls the processes in a reliable manner. The components are installed, individually coordinated with one another and adapted to the software precisely as the situation in the store requires.



The ExitGates are connected and controlled via a LAN connection or the RS 485 standard computer interface

Standard technical equipment

- Max. operating voltage of 24 V DC for the highest levels of safety.
- eGate systems comply with both national and international safety requirements.
- Even opening of the swivel arms. No swing back. Best positioning globally.
- Synchronised opening of the swivel arm in all double systems without a central divider.
- Infinitely variable opening angle from 0º – 180º. Precise adjustment using the teach-in procedure.
- Freely programmable opening time, after which the system closes again automatically.
- Once the customer has passed through the light barrier, the ExitGate closes after the pre-set time (e.g. 2 seconds)
- Adjustment of the opening direction possible on-site.
- RS485 interface: Data exchange and remote control via PC.

Swivel arm Promotion

Power supply from the ceiling

230 V feed line and signal line from the ceiling mean that no structural work is necessary and simplify alterations.

Radio remote control

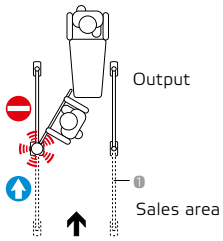
Remote control of one or more systems. Release in the direction of passage, exit direction or set to permanently open.

Control panel

Passage release for one person using a button, set to permanently open with switch and passage of staff in the opposite direction using a button.

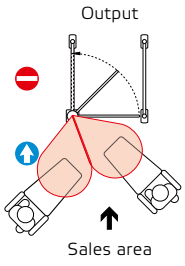
Barrier tampering alarm fitted as standard

If the barrier is deliberately manipulated during the closing process, an acoustic alarm is triggered.



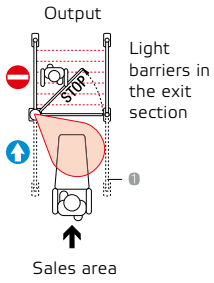
Tandem radar

For narrow and problematic exit zones.
The second radar detects customers who approach from an acute angle. Both radar beams can be adjusted individually to suit the relevant situation. A second radar module can also be retrofitted.



Swivel range monitoring

The “barrier stop” swivel range monitoring protects persons, and especially children, from possible injuries.
In the exit section, integrated light barriers detect obstacles in the swinging area and stop the movement of the swivel arm.



Smart Exit

Wanzl AI and sensors monitor the self-checkout area. After payment at the SCO terminal, customers can leave the store via the exit gate – without additional scanning of the receipt.

Reverse detection alarm

The direction-sensing radar triggers an acoustic alarm or a voice announcement.

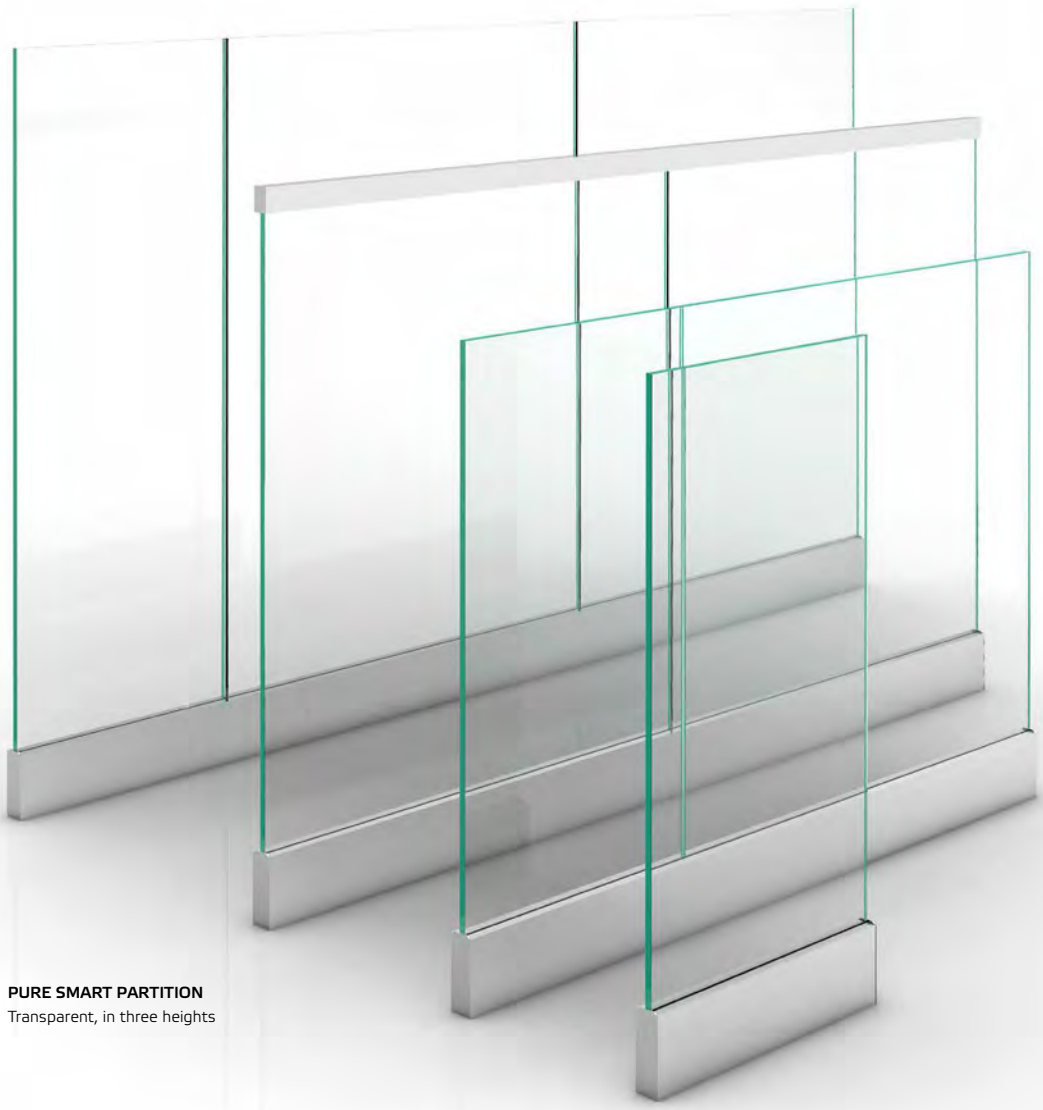
- ***› Effective separation along with impression of openness***
- ***› Available with or without handrail***



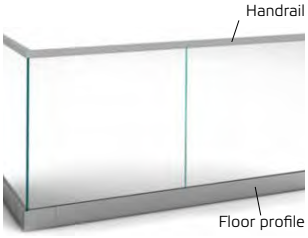
PURE SMART PARTITION
Transparent, in three heights

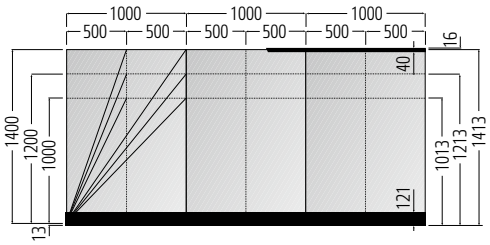
03.01 Pure SMART partition system

■ Partitions and barriers with the **Pure SMART partition system** give rooms an open look. They underscore the elegant appearance of the most diverse kinds of shops and facilities, boutiques and trend stores, cafés and snack bars, reception and exhibition rooms, and more.

Clear division

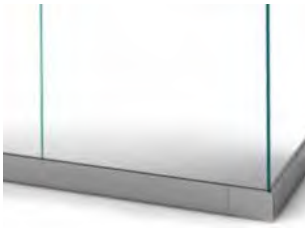
Toughened safety glass elements in floor stands divide the different areas. With handrail on request.





No joints

The toughened safety glass elements **have no gaps when they are installed straight and perfectly square**.



Saves labour

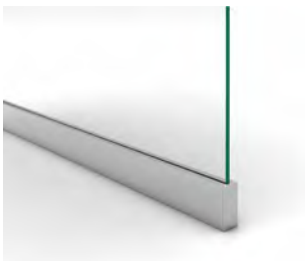
Particularly **easy to clean** due to flush floor fit.

Partition elements

Multiple attractive solutions can be achieved using the **12 mm thick toughened safety glass elements** in six different sizes.

Stable floor profiles

Excellent stability. Simple and quick installation on finished floors using heavy duty steel anchors.



Base profiles, handrail, toughened safety glass elements

Design: Floor profiles, bottom profile corner, handrail and handrail corner made of aluminium with stainless steel effect. Toughened safety glass elements with KPO-polished edges, r = 4 mm. Rubber profiles for affixing the toughened safety glass elements.

03.02 Railix® Design partition system

Transparent partitioning

- ***Variable and cost-effective way of designing spaces***
- ***High level of protection against damage***
- ***Effective protection against shoplifting***

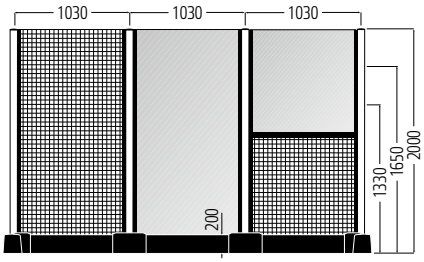
RAILIX DESIGN
Closed front, with high level of protection against theft

03.02 Railix® Design partition system

The **Wanzl Railix Design partition system** makes perfect room partitions possible. It is flexible and adaptable in all directions – thanks to corner elements that permit connections at between 90° and 270°. An elegant, easy to install and therefore cost-saving room solution offering a great deal of creative freedom.

With transparency

Transparent acrylic glass elements and/or wire grate elements effectively separate the different areas.



Inventory shrinkage

The acrylic glass elements close fully with no gaps, while the wire grates have a mesh size of 50 x 50 mm.

Protection

Plinth and corner elements, as well as plinth profiles, provide perfect protection against damage caused by shopping trolleys.

Cleaning

The flush floor connection makes the partitioned area particularly easy to clean – no matter whether cleaning is carried out by hand or using a machine.

Bases, partition elements

Design: Bases made of steel tubing with base plate. Plastic insert profiles, plinth and corner elements, plinth profiles and wall mounts in anthracite grey, RAL 7016. Partition elements made of wire mesh: high-gloss chrome-plated, plastic powder-coated or in transparent acrylic.

Finish: Bases with high-gloss chrome plating, plastic powder coating, or stainless steel. Wire mesh elements: high-gloss chrome-plated finish or plastic powder coating.

03.03 Railix® Security partition system

Partitions to satisfy the very highest requirements

- ***› Transparent partitioning for every security requirement***
- ***› High resistance level***
- ***› Fast and economical assembly***

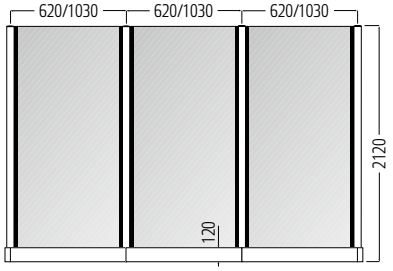
RAILIX SECURITY
With particularly hard-wearing base profile

03.03 Railix® Security partition system

Wanzl Railix Security partition system. The rectangular base profile forms the foundation for this sophisticated, high-quality and proven partition system. It enables quick and easy installation.

Clear

Transparent acrylic glass elements effectively separate the different areas.



Inventory shrinkage

The acrylic glass elements close fully with no gaps, effectively making shoplifting more difficult.

Sturdy protection

The rectangular base profile provides protection and is resistant to high levels of stress.

Cleaning

The flush floor connection makes the partitioned area particularly easy to clean – no matter whether cleaning is carried out by hand or using a machine.

Bases, partition elements

Design: Bases made of steel tubing with base plate. Insert profiles made of plastic in RAL 7047, tele grey 4. Rectangular base profile made of high-gloss chrome-plated steel. Partition elements made of acrylic, transparent, 9095.

Finish: Bases with high-gloss chrome-plated finish

03.04 Railix® Basic partition system

Elegant clarity

- ***Versatile range of applications***
- ***Generous feeling of space due to unobtrusive construction***
- ***Cost-effective dividing elements for many areas of application***

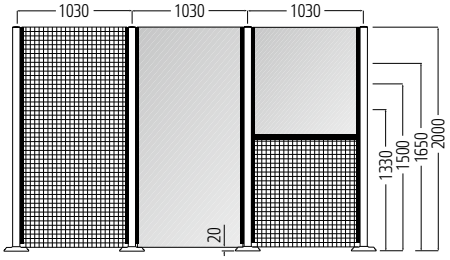
RAILIX BASIC
Partition elements that do not allow anyone to reach round the side

03.04 Railix® Basic partition system

Wanzl Railix Basic partition system. With this system, room partitions and barriers gain a "face", characterising and dividing rooms into multiple areas. Its range of uses extends from effective draught prevention to attractive privacy protection.

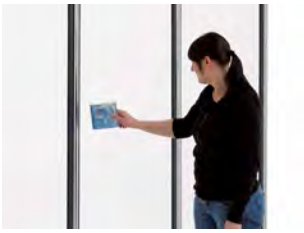
Clear division

Transparent acrylic glass elements and/or wire grate elements effectively separate the different areas.



Inventory shrinkage

The acrylic glass elements close fully at the side, with no gaps, while the wire grates have a mesh size of 50 x 50 mm.

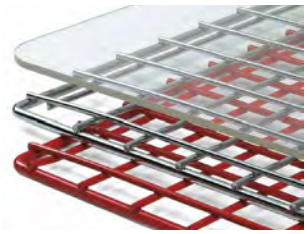


Stable base plates

Large base plates with metal base plate covers ensure the bases are stable.

Partition elements

Solutions tailored to the situation can be achieved with a wide range of sheet materials, e.g. wood, perforated steel plate or plastic.



Security design

The partition elements with recesses for base plates close gaps at the floor securely.

Bases, partition elements

Design: Bases made of steel tubing with base plate. Insert profiles made of plastic in RAL 7016, anthracite grey. Partition elements made of wire mesh: high-gloss chrome-plated or plastic powder-coated or in transparent acrylic.

Finish: Bases with high-gloss chrome plating, plastic powder coating, or stainless steel. Wire mesh elements: high-gloss chrome-plated finish or plastic powder coating.

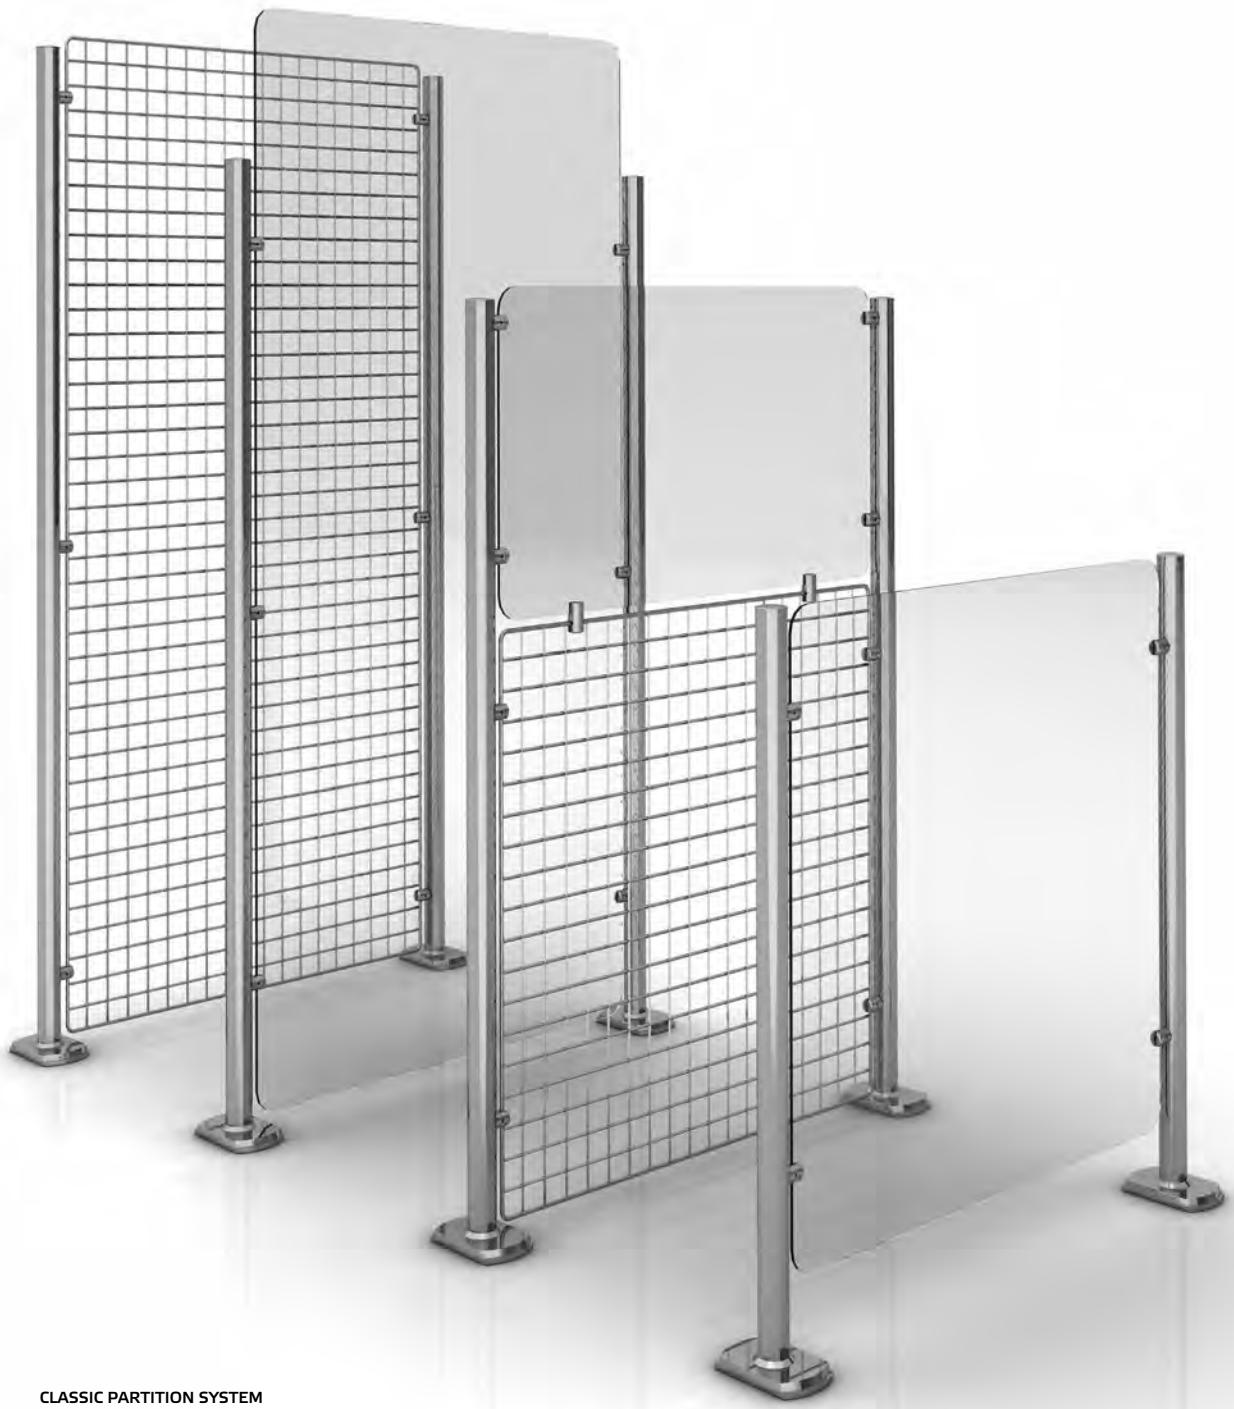
03.05 Classic partition system

Elegant transparency

- ***Versatile range of applications***
- ***Generous feeling of space due to unobtrusive construction***
- ***Attractive fastening clamps for wire mesh and acrylic elements***



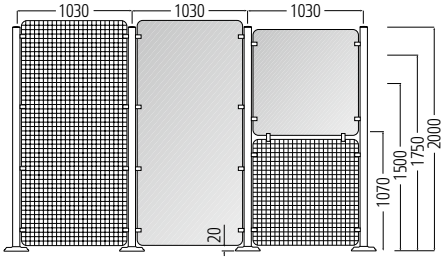
CLASSIC PARTITION SYSTEM
With attractive metal fixing clamps

03.05 Classic partition system

Wanzl Classic partition system. High-gloss chrome-plated connecting elements highlight the quality of this tried-and-tested system. The application areas are appropriate and diverse.

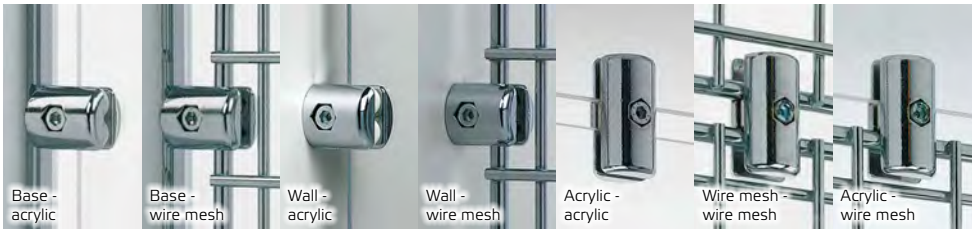
Clear division

Transparent acrylic glass elements and/or wire grate elements effectively separate the different areas.



Versatile

Sturdy, high-gloss chrome-plated fixing clamps for round bases, straight walls and connectors for panels and grids.



Inventory shrinkage

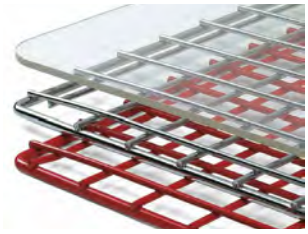
The acrylic elements and wire mesh with a mesh size of 50 x 50 mm are safely secured by the fastening clamps.

Stable base plates

Large base plates with metal base plate covers ensure the bases are stable.

Partition elements

Appealing solutions that are appropriate for the specific situation can be achieved using wire grate and/or acrylic glass partition elements.



Bases, partition elements

Design: Bases made of steel tubing with base plates. Metal fixing clamps. Partition elements made of wire grate with a high-gloss chrome-plated finish or coloured plastic powder coating, or in transparent acrylic glass 9095.

Finish: Bases with high-gloss chrome plating, plastic powder coating, or stainless steel. Wire mesh elements: high-gloss chrome-plated finish or plastic powder coating.

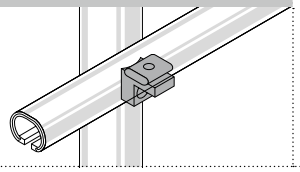
1 M8 x 30 screw

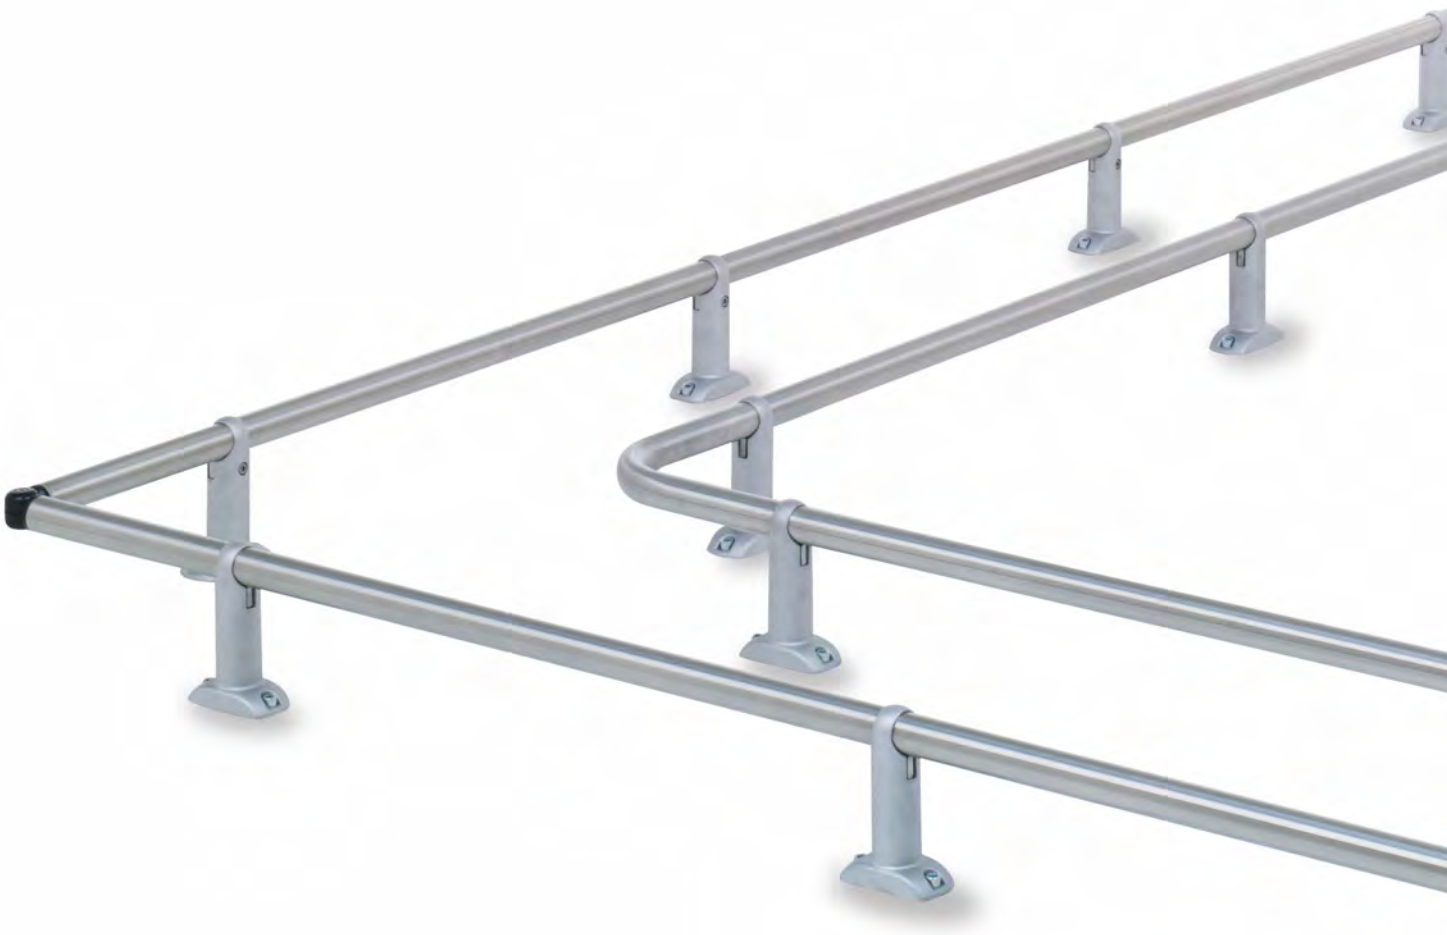


Installation fittings for floor installation available on request.

04.03 Stainless steel guide bumpers

Perfect protection for shop fittings against bumps from shopping trolleys

- ***Made from stainless steel and aluminium – corrosion-resistant***
- ***Rectangular or rounded feet available***
- ***Variable corner connectors from 90°–270°***



Wanzl stainless steel guide rails effectively protect the shop fittings, fridges, service counters, etc. from damage caused by shopping trolleys and transport devices. The rounded foot construction is of particular benefit when using cleaning machines.

Design: Polished stainless steel tubing. Feet and corner connectors in cast aluminium, uncoated or with coloured plastic powder coating in RAL 9006 white aluminium.

Accessories: End caps, tubes curved at 90°, Vario corner connectors, connection elements.

04.05 Ram protection hoops

Can be used effectively in many areas

- ***› Quick and easy assembly***
- ***› Coordinated exactly with Wanzl shopping trolleys with castor diameter 125 mm***
- ***› Made of steel tubing – high-gloss chrome-plated or stainless steel finish***

The **Wanzl ram protection hoops** protect shop fittings, fridges, cash desks, doors, radiators etc. against damage caused by shopping trolleys.

Design: Barrier and corner barrier made of steel tubing, diameter 40 x 2 mm. On-floor installation either screwed using steel sleeves or pinned using floor sockets. Finish: high-gloss chrome-plated or stainless steel.

04.05 Ram protection hoops

Function: In the floor socket design, barriers and corner barriers can be removed for cleaning. The floor sleeves are then sealed using the plastic plugs provided during cleaning. This is particularly beneficial in achieving the best clean when using cleaning machines.

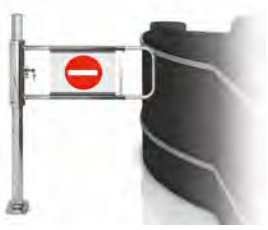
LOCKABLE CHECKOUT BARRIER
High model with base



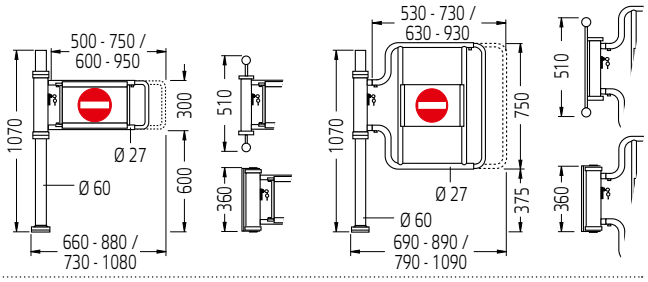
Application examples

05.01 Classic checkout gates

Wanzl checkout barriers are tried-and-tested, reliable components for the checkout area. Clear signals and reliable barriers control the flow of customers and make shoplifting considerably more difficult. Customers can only leave the store via manned tills.

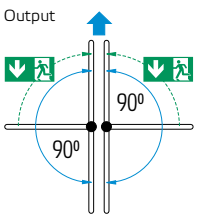
Design

Sturdy steel tube. Info sign made of plastic, with "no entry" symbols printed on both sides, with protection profile as standard. Lock integrated in plastic housing. High-gloss chrome-plated or coloured plastic powder coated finish.



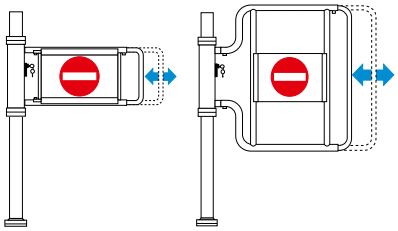
Function

Once the checkout barrier has been unlocked, the gate can be pivoted in either direction and always locks in the 90º position. Anti-panic feature as standard.



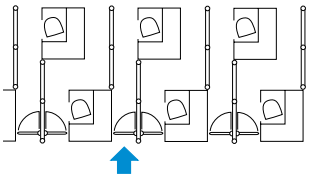
Extendable barrier

Extendable for adaptation to access widths.

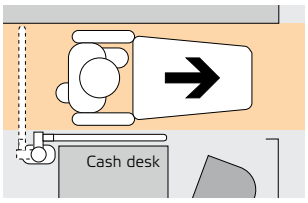


Space-saving installation options

Checkout barrier installed between connecting tubes
Ideal for checkout zones with restricted space available.



Installation with 90º angle adaptor
Base installation in front of the cash desk. 2 adapters are required per swivel barrier. High-gloss chrome-plated finish.



90º angle adapter, 1 unit
Order no. 23.08415.10

For replacement needs

Individual info signs, front, rear, and plastic profiles for installation on request.

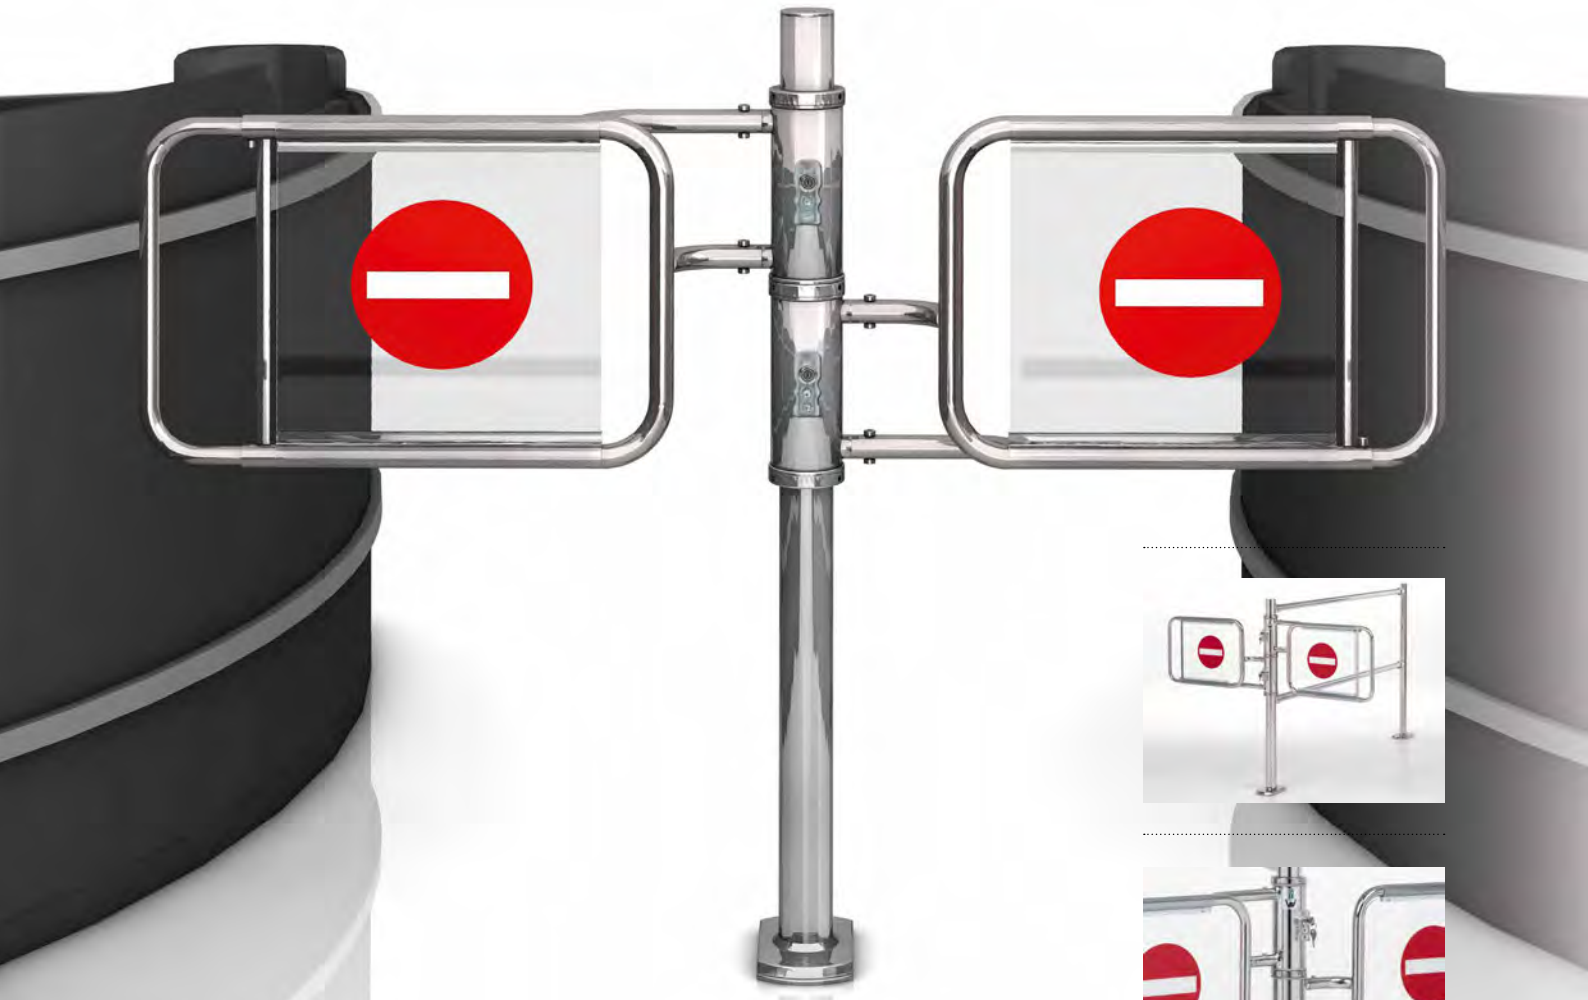
05.02 Tandem checkout gates

A checkout gate with a double function for two tills

- ***Intelligent checkout gate solution for space-saving checkout installation***
- ***Extendable arms for precise adaptation to access width***
- ***With anti-panic feature as standard***



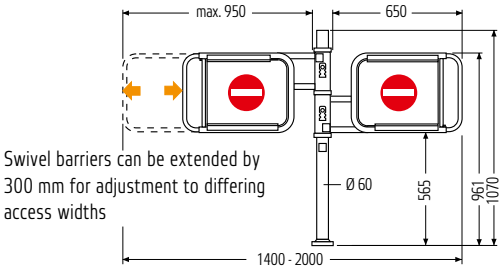
TANDEM CHECKOUT BARRIER
Opening in both directions

05.02 Tandem checkout gates

Wanzl Tandem lockable checkout barrier. The compact and secure solution between two cash desks. Optimum use is made of the available space, and the access widths are fully retained. The Tandem checkout barrier is also available as an individual solution.

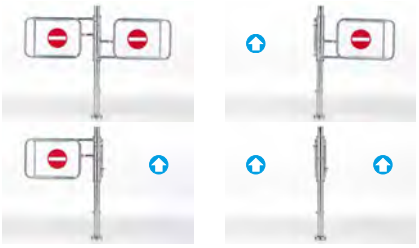
Design

Base made of steel tube. Swivel parts with lock as standard. Extending swivel arms. High-gloss chrome-plated or coloured plastic powder coated finish. Info signs optionally in white plastic or transparent acrylic.



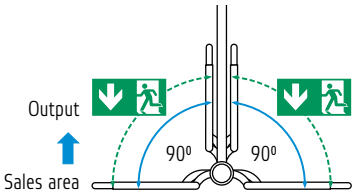
Function

The two checkout barriers can be operated independently of one another.



Anti-panic function as standard

The opening direction and emergency exit direction is always in the direction of the exit.



Assembly examples

The optimum installation position is at the start of the checkout's conveyor belt. With the Wanzl Classic customer guidance system, other positions are also possible.

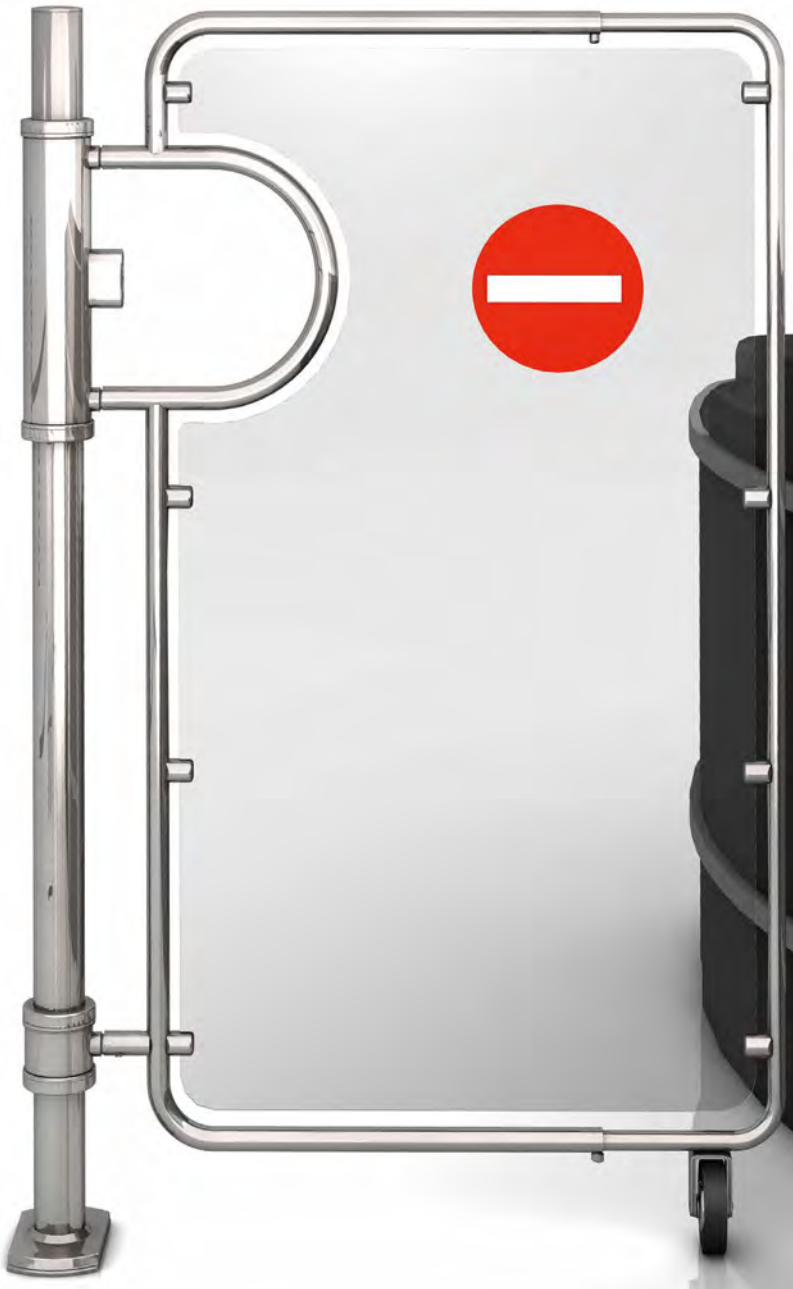
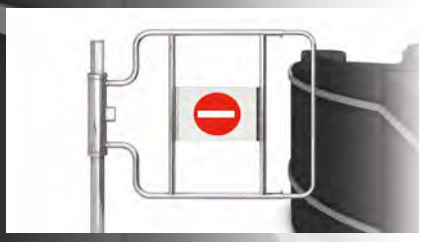
05.03 S and FS checkout gates

Greater security at the checkout

- ***Locks automatically in the 90º position***
- ***Pull-out gate for precise adaptation to access width***
- ***With anti-panic feature on both sides as standard***



FS CHECKOUT BARRIER
On the base



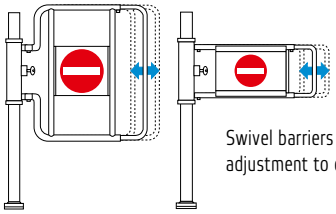
Application examples - S checkout barriers

05.03 S and FS checkout gates

The **self-locking Wanzl S and FS checkout barriers** give you greater control over inventory differentials. These checkout barriers lock automatically and cannot be opened by customers. That means optimum security at unmanned checkouts.

S design checkout gates

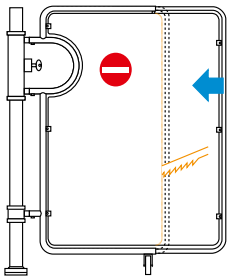
Installation with base, at the cash desk or between connection tubes. Swivel parts with lock as standard. Extending swivel arms. High-gloss chrome-plated or coloured plastic powder coated finish. Info signs in white plastic or transparent acrylic.



Swivel barriers can be extended by 300 mm for adjustment to differing access widths

FS design checkout gates

Assembly with high base. Swivel parts with lock as standard. Adjustable-length swivel arm with integrated support roller. High-gloss chrome-plated or coloured plastic powder coated finish. Transparent acrylic glass panels, with no entry symbols on both sides.



Swivel barrier can be shortened to the required passage width. The acrylic glass filling is shortened on-site as required.

Design pend.

Optimum security

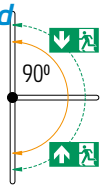
- High design to prevent people climbing over
- Difficult to pass goods through
- Significant reduction in number of thefts

Function

After releasing the checkout barrier with the key, the swivel arms can be moved in both directions and locked automatically in the 90⁰ position. The key can be removed before the end position is reached.

Anti-panic function as standard

The checkout barriers can be opened in both directions with a certain amount of counter-pressure.

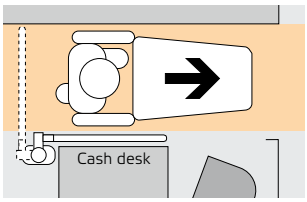


Accessories

Reduces inventory shrinkage!

Acoustic panic alarm
The acoustic panic alarm notifies the personnel when the panic alarm is triggered by unauthorised persons.

Installation with 90⁰ angle adaptor
Base installation in front of the cash desk. 2 adapters are required per swivel barrier of the S checkout barrier. High-gloss chrome-plated finish.



90⁰ angular adapter, 1 unit

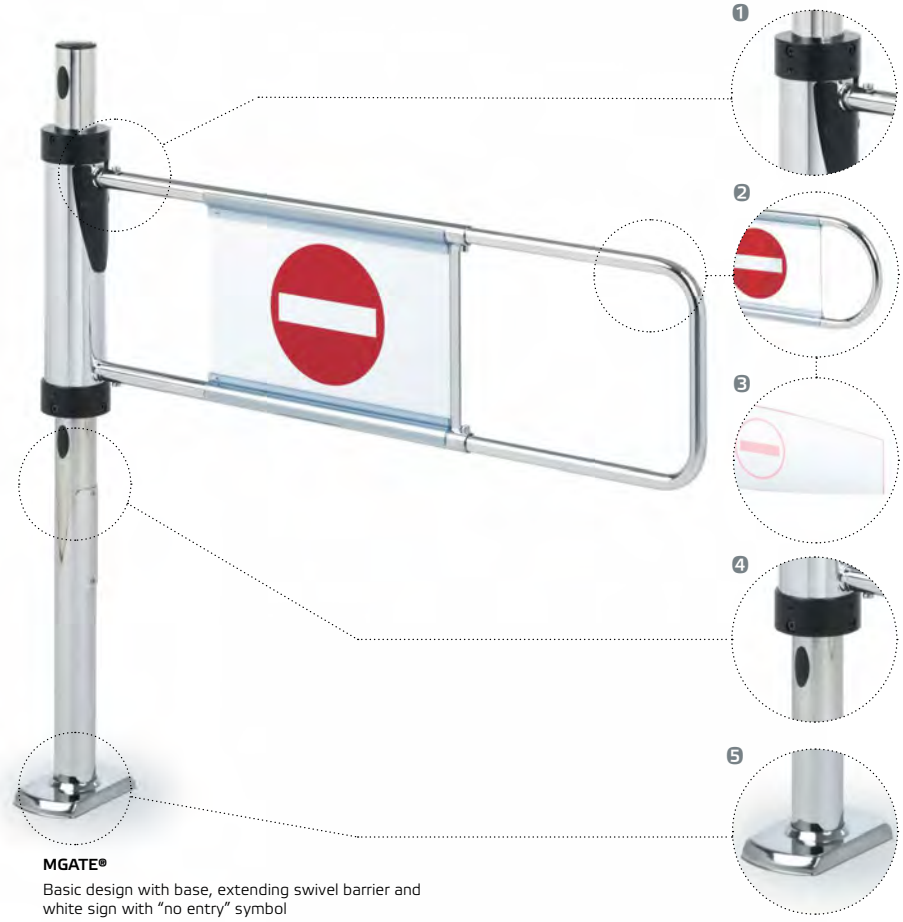
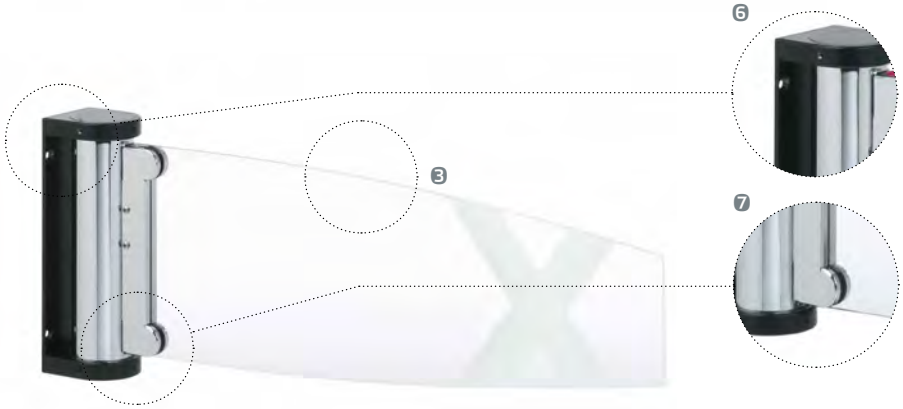
MGATE®
Basic design with flange, Classic swivel barrier and white sign with “no entry” symbol

05.04 mGate® / mGate® Colour

mGate® barriers are the most modern and innovative of their kind. The intelligent control electronics enable reliable operation at all times and allow you to specially adapt the product to your needs. The improved design, new functions and diverse barrier options expand the application range for checkouts, information desks, etc.



MGATE®
Basic design with base, extending swivel barrier and white sign with “no entry” symbol



MGATE®
Basic design with flange and ESG swivel arm with “no entry” symbol (design example available on request)

1 SWIVEL COMPONENT
With connecting ports for installing the Classic or Colour Classic swivel barriers

2 SWIVEL BARRIER
With white or transparent sign
- made from sturdy steel tube in three lengths
- made from sturdy steel tube, extendable
- made from sturdy steel tube in high model, extendable

With illuminated sign
- made from sturdy steel tube, length-adjustable

SIGN (EXAMPLE)
Transparent sign with no-entry symbol

3 SWIVEL ARM
Made from shatter-proof safety glass
- for individual lettering
- with “no entry” or “arrow” symbol

Colour made from shatter-proof safety glass
- for individual lettering
- with “no entry” or “arrow” symbol
- visual light guide with LED light strip
- customisable colour options

Swivel arm (EXAMPLE)
Safety glass design with “no entry” symbol

4 BASE
Sturdy steel tube Ø 60 mm
Connections for Classic customer guidance system available as standard in 90°, 180° and 270° versions and covered with plastic caps

5 BASE PLATE
Four screw connections
Slots for precise alignment
Base plate cover made from steel plate

6 FLANGE
Sturdy assembly plate with four fixing holes

7 SWIVEL COMPONENT
With holders for toughened safety glass swivel arms or toughened safety glass Colour swivel arms

⚠
Please note: mGate® and mGate® Colour are not entry systems, exit systems or ExitGates. They are only to be used for the information area or as checkout barriers.

05.04 mGate® / mGate® Colour

Reducing inventory shrinkage

When checkouts are not in use, the mGate ensures that customers can only pass through staffed checkouts. Your staff are immediately alerted of any attempts at manipulation by means of an alarm.

Opening up escape routes

In the event of an emergency, the system opens up the checkout area/exit to provide an escape route. To restore normal operational readiness, the mGate returns to its original position completely automatically.

Design

Basic design with base: Base with base plate and base plate cover for floor mounting. Casing for swivel mechanism, either high-gloss chrome-plated or with coloured plastic powder coating. Energy-saving brake system. Fitted with panic alarm and panic function on both sides as standard and connections for attaching the Wanzl Classic customer guidance system.

Basic design with flange: Sturdy assembly plate for installation on cash desks or walls. Casing for swivel mechanism, either high-gloss chrome-plated or with coloured plastic powder coating. Energy-saving brake system. Fitted with panic alarm and double-sided panic function as standard.

Swivel barriers: Sturdy steel tube with white or transparent plastic sign, available with either “no entry” symbols on both sides or with an “arrow” symbol on the front and a “no entry” symbol on the back.

Colour swivel barrier: Sturdy steel tube with illuminated glass sign with “no entry” symbol visible on both sides.

Toughened safety glass swivel arm: Shatter-proof safety glass for individual lettering or with “no entry” symbol.

Colour toughened safety glass swivel arm: Shatter-proof safety glass for optimal light guidance, for individual lettering or with “no entry” symbol and LED light strip at bottom. LED light colour can be customised.

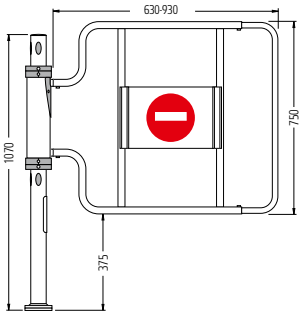
with extendable swivel barrier



with high model swivel barrier

05.04 Practical exits, attractive passageways

Functions

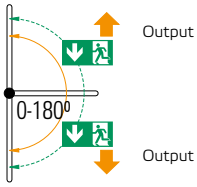
Adjustable opening angle (0-180º), can be programmed using teach-in. Reliable and precise locking mechanism. Automatic barrier reset and double-sided anti-panic feature.

Controls

Controlled by checkout computer, Checkout Manager Pro, RFID, network module WENI control with LAN connection, control panel or button. In combination with Checkout Manager Pro, the mGate® opens and closes automatically when the operator logs in or out of the checkout.

Electronic anti-panic feature

Double-sided with acoustic panic alarm and automatic swivel arms/ swivel arm reset.



Minimum energy consumption

Operating voltage of 24 V DC for optimum safety; systems therefore comply with national and international safety requirements. Energy-saving thanks to fail-safe brake – the brake fixes the swivel arms in the latching positions without consuming electricity.

Accessories

RFID sensor for opening using card or key ring (e.g. time recording). After release, the **Push2Go function** is activated and the barrier is opened by gently pushing it in the required direction of passage.

Control panel, control panel with WENI control or button for manual opening.
Webserver (software) for control panel with WENI control, can be operated using a web browser on a tablet or smartphone.

N EXIT
With standard swivel barrier as an emergency exit

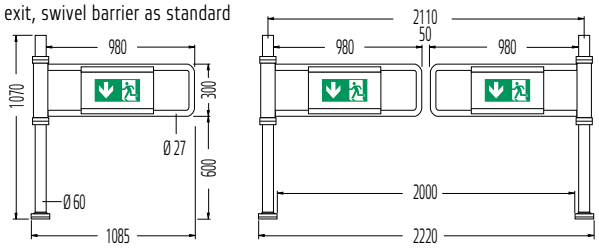
05.05 N exit

Wanzl N exit. No need to panic. With this tried-and-tested building block from Wanzl's customer guidance range, you're always on the safe side – as are your customers.

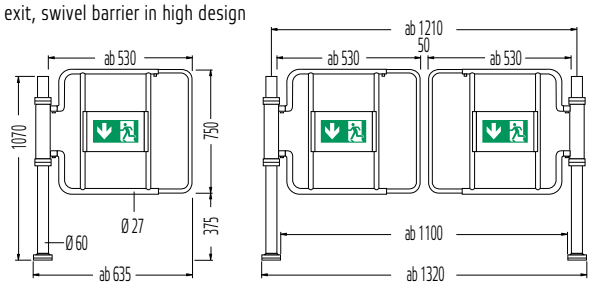
Design

Sturdy construction from steel tube. Swivel barriers in standard or high design, high design extendable for variable access widths. High-gloss chrome-plated finish. Plastic info signs, including set of stickers. Anti-panic feature on both sides.

N exit, swivel barrier as standard

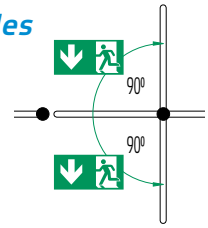


N exit, swivel barrier in high design



Anti-panic feature on both sides

Opens when a certain pressure is applied in both directions. The emergency exit direction or the escape route is defined by affixing the set of stickers.



Function

The swivel arms open to 90º when a certain amount of pressure is applied in the direction of escape in an emergency. The escape route is cleared.
After the swivel arm has been pressed back into the initial position, the system is ready for operation once again.

Safety

N exits comply with the guidelines of the German Equipment Safety Act [Gerätesicherheitsgesetz].
As a result, official safety requirements are satisfied.

06 Product overview

06.01 Wanzl connect

01 **DIGITAL POS**

06.02 Checkout Manager

02 **CHECKOUT MANAGER PRO**

06 Store management

06.01 Wanzl connect®

Store management of the future

- ***The digital platform for efficient store management***
- ***Constantly up-to-date and comprehensive information on the store situation and customer behaviour***
- ***Modular structure, expandable and updateable***

Wanzl connect® offers Wanzl customers a centrally controlled, digital platform with which they can record, analyse, evaluate and, if necessary, control a large number of relevant processes in the areas of administration and personnel management according to their own requirements.

Wanzl connect® is designed as a closed-content "Store Management System", whose individual components are coordinated with one another for the requirements and needs of the retail segment.

Wanzl connect® is modular, cloud-based and can be expanded as required with Wanzl's range of area and function-based add-on modules. These, including the basic module, are continuously updated in terms of functional depth and scope, and are made available to Wanzl customers with corresponding updates.

Hardware requirements

The prerequisite for using wanzl connect® is the use of standard hardware: PCs, laptops, tablets or smartphones that allow online access to the wanzl-connect cloud via standard browsers. Additional peripherals (such as scanners or cameras) can also be added to the existing network.

All information is stored in the cloud; from there, it can be retrieved, analysed and evaluated with the aid of the tools provided.

06.01 Wanzl Gate Monitoring

Starting situation

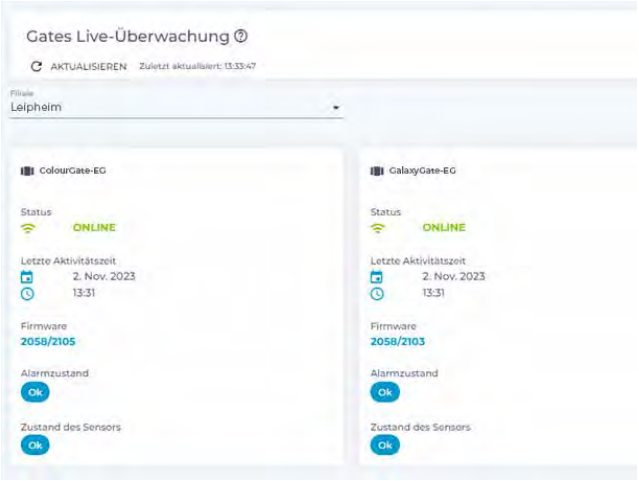
The functionality of entry and exit systems at the POS has become increasingly important in the retail sector in recent years. This is mainly because they enable store entries and exits to be comprehensively tracked so that the associated customer movements can be accurately evaluated and you can use this data to identify consequences for your store operations.

The Wanzl solution

With **Wanzl Gate Monitoring**, we are consistently following our motto for the conception and development of manual and electronic guidance systems:

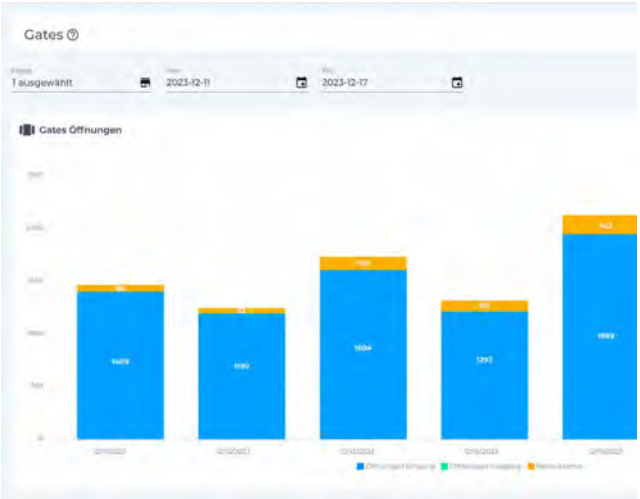
Steering– Guiding– Demarcating – Protecting

The Gate Monitoring System provides a clear overview of all entry and exit systems within a store area. All the information can be accessed via the dashboard and analysed by different categories. Potential equipment failures can be quickly and accurately identified.



The technology

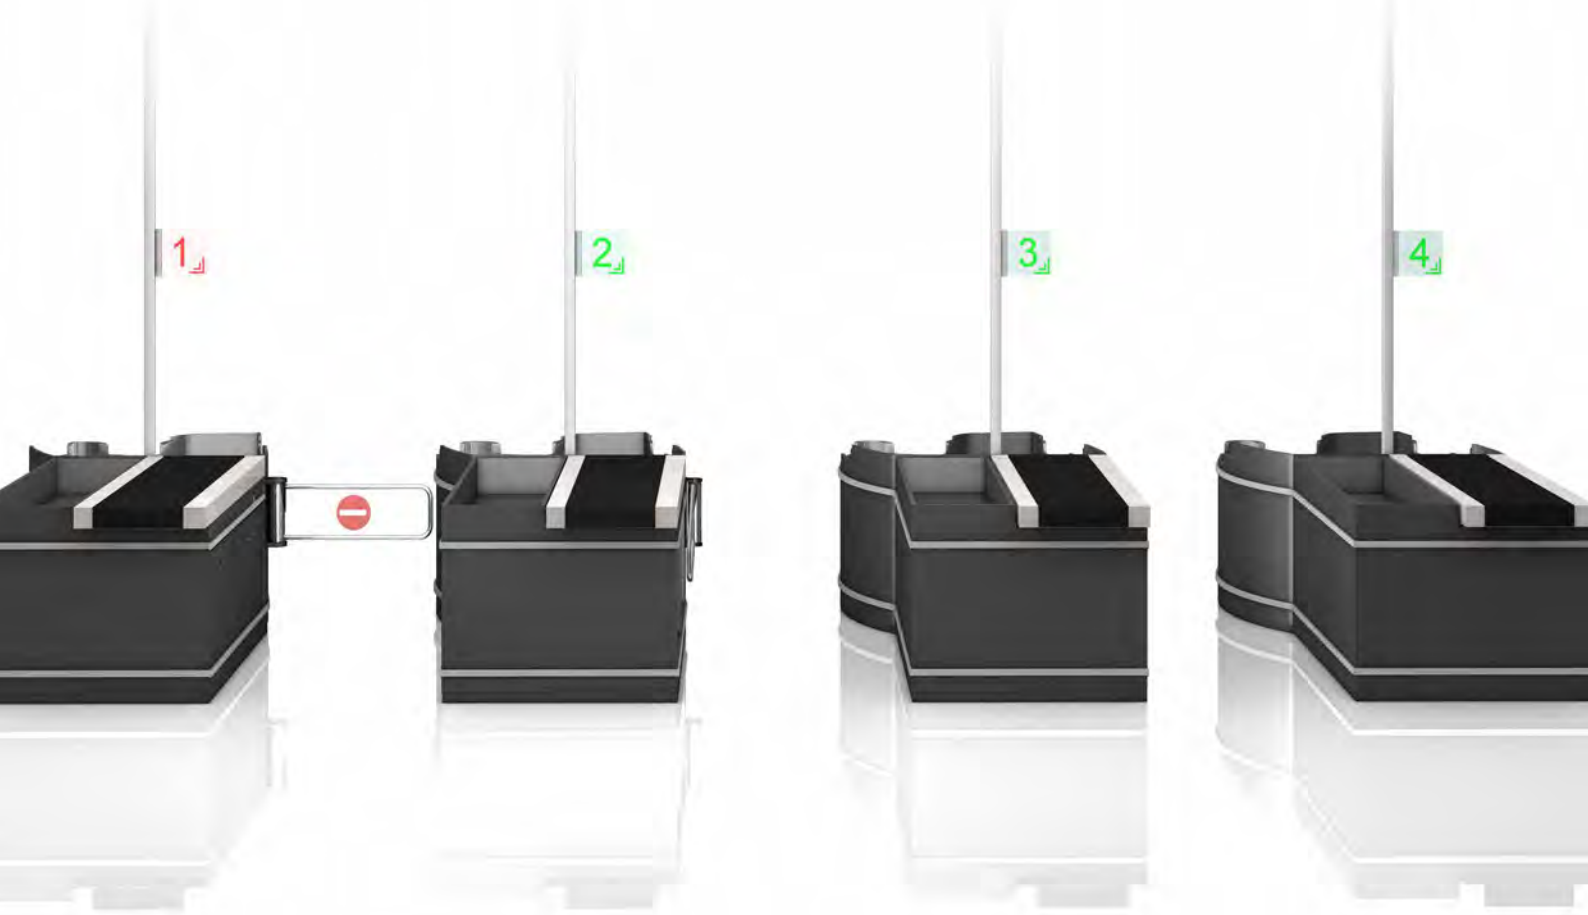
Depending on the specific market situation and environment, Wanzl has a range of system components in the area of control and safety systems that can be combined with each other in terms of the jointly developed safety concept. Gate monitoring is an integral part of such concepts and summarises the information recorded by the relevant entrance and exit systems in a clear form.



06.02 Checkout Manager PRO

Checkout guidance system for mGate® checkout to satisfy the most stringent requirements

- ***› Reduces customer waiting times through targeted deployment of staff***
- ***› Future-proof thanks to state-of-the-art technology and interfaces***
- ***› Individual voice prompts – ensuring maximum benefits for customers and staff***



CHECKOUT MANAGER PRO
in combination with mGate® checkout

Checkout Manger Pro enables processes in the checkout area to be coordinated in a reliable manner. Through targeted deployment of personnel, checkouts are staffed and waiting times for customers are reduced.

Individual voice announcements inform customers about the opening and closing of the tills, and also notify store managers and staff of where in the store they are required.

Design

Checkout Manager Pro consists of the following basic package per checkout: LED display unit, control unit with power supply unit and control panel with housing.
Checkout Manager PRO-Light uses the store's existing sound system.

06.02 Checkout Manager PRO

LED display unit

The **LED display unit** is an eye-catching feature that draws attention to the checkout area and informs your customers whether the checkout in question is available. This helps avoid irritating waiting times.

Design pend.

Future-proof technology

Clearly arranged **control panels** for up to ten checkouts with housing. Also available for installation in cash desks or for wall mounting on request. All control elements are easy to use and offer individual installation possibilities.

With housing

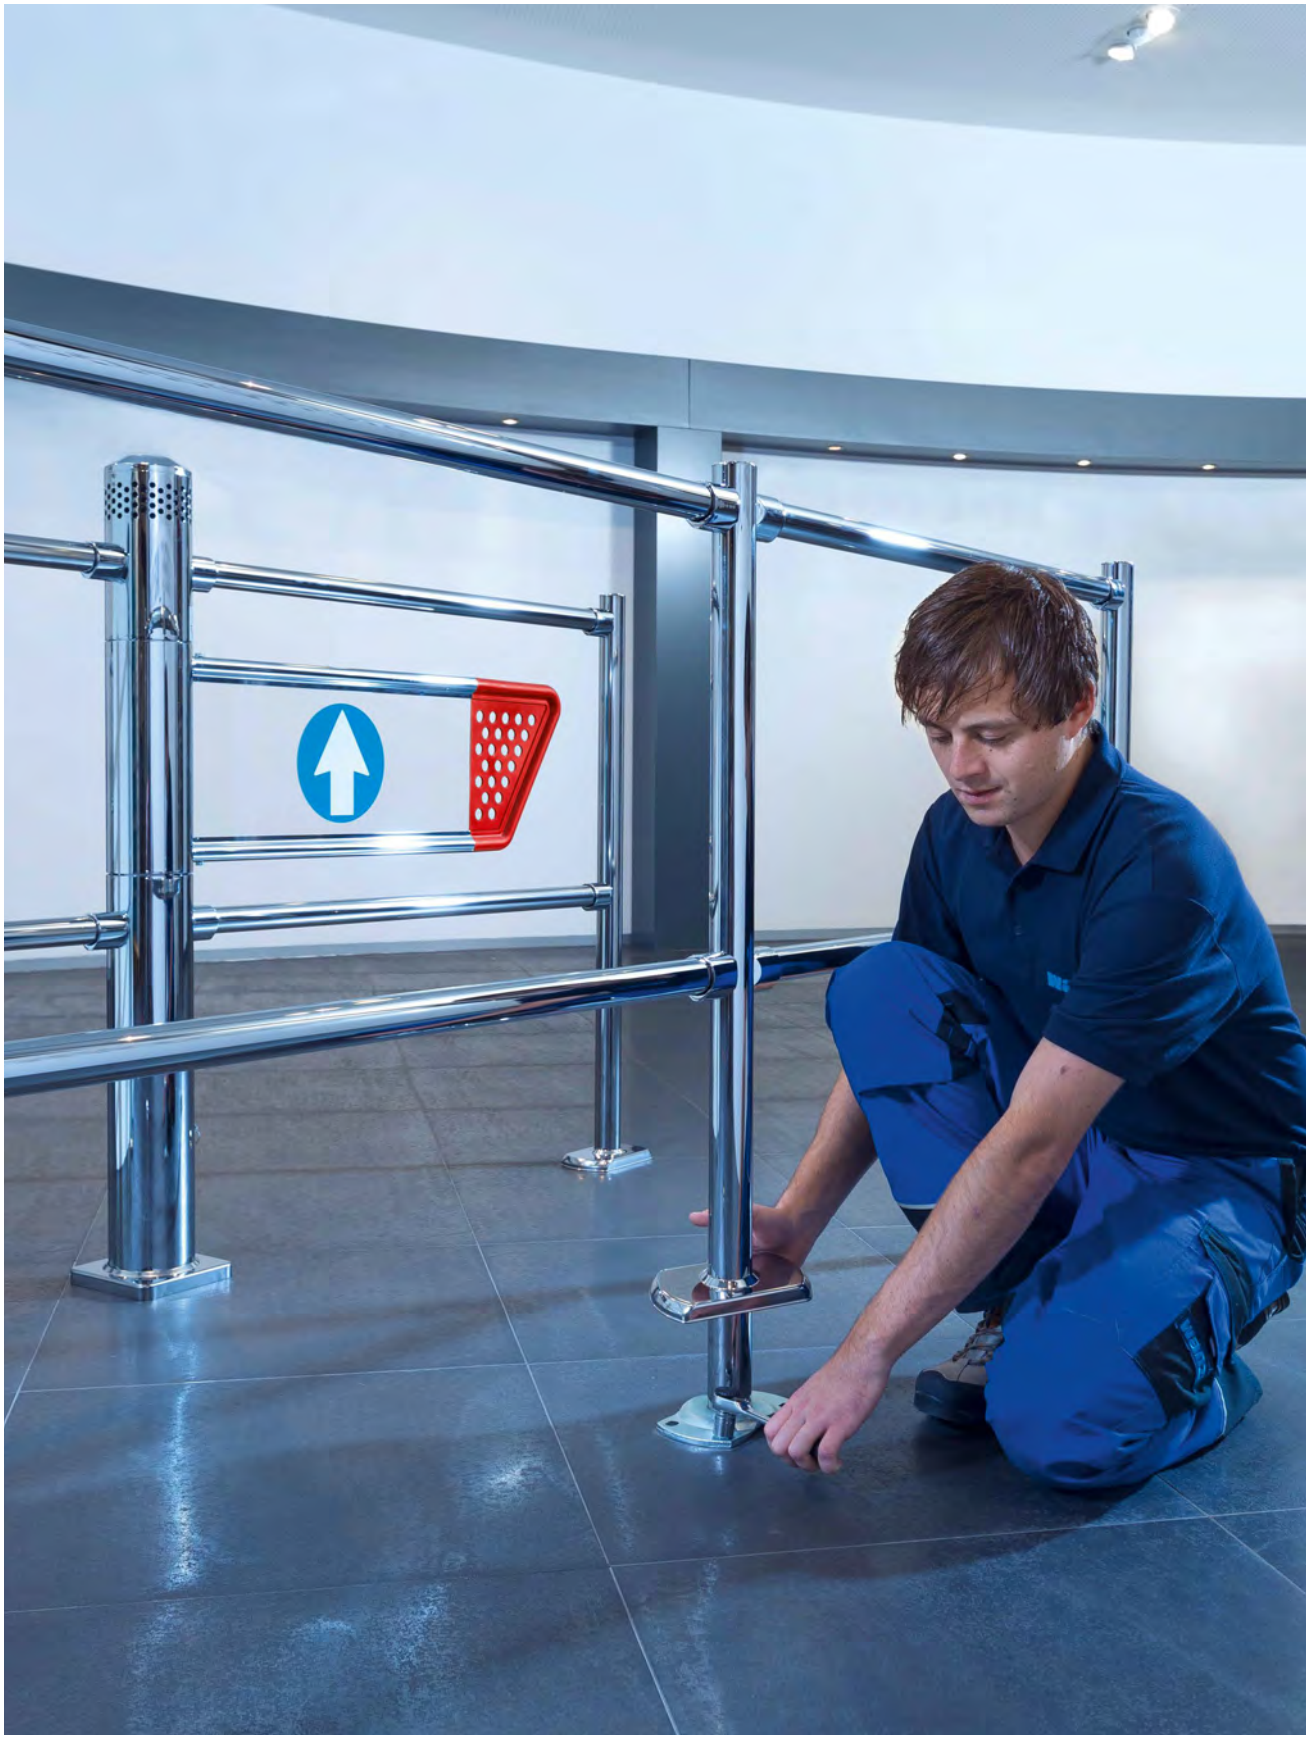
08 **SPECIAL BASE PLATES**

07 Service



07.01 Electrical installation

Laying the empty conduits for the electrical installation on site

- ***For time-and cost-saving installation of the entrance system***
- ***To prevent damage during installation***
- ***Avoids unnecessary demolition work, particularly with new structures***

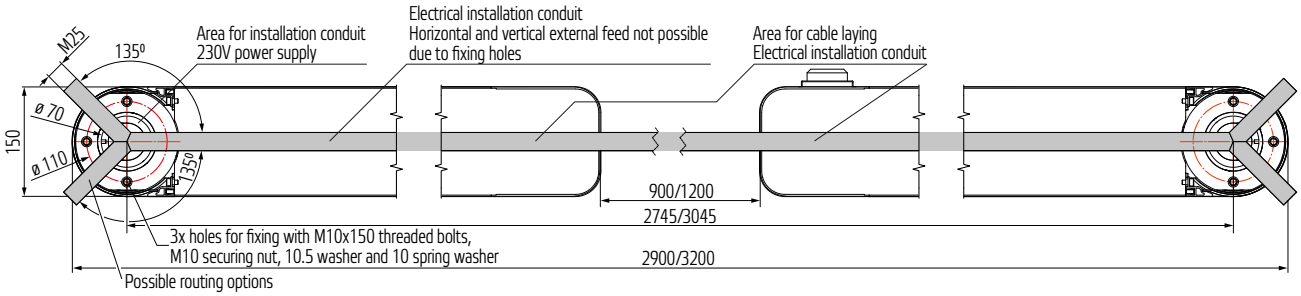
Planning and assembly with Wanzl. The timely involvement of Wanzl in the planning process for new systems and conversion measures makes it possible to save costs and safely connect entrance systems through empty conduits in the floor. This is the shortest and most reliable path when controlling double or double-gate systems. Make use of our service engineers' experience and skills and ensure that you retain full warranty cover

07.01 SlidingDoor

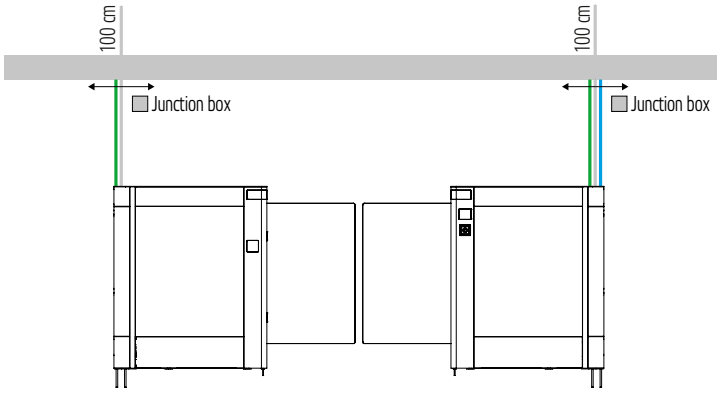
Assembly

The SlidingDoor is installed using adhesive anchors. To do this, threaded rods are glued into the load-bearing floor. The body is set up on the adhesive anchors and screwed on with nuts.

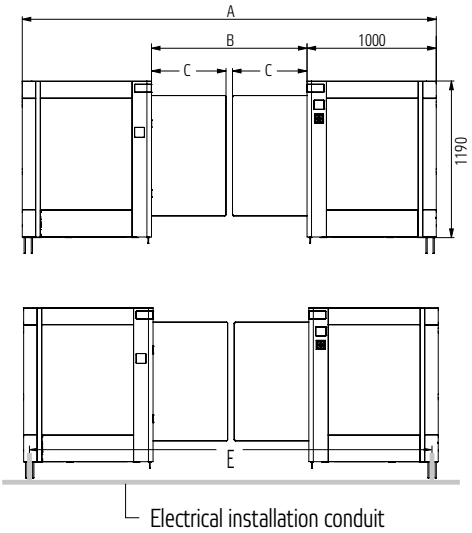
Laying **electrical installation conduits** with power supply from floor



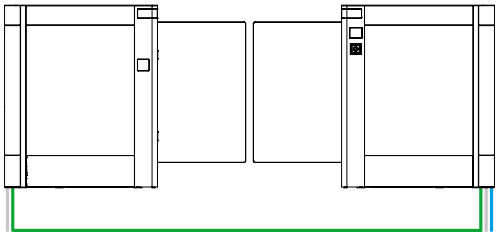
Power supply from the ceiling



Voltage supply 230V, 50HZ/60W | Cross connection | Network cable on the side of the barcode reader
If required: Network cable from CAT5E
with network socket or RJ45 plug



Power supply from the floor



Voltage supply 230V, 50HZ/60W | Cross connection | Network cable on the side of the barcode reader
If required: Network cable from CAT5E
with RJ45 plug and 50 cm overhang

SlidingDoor installation dimensions

A	B	C	E
Passage width	Outside measurement	Extended length of the glass door	Axis dimensions of electrical installation conduit
900 mm	2,900 mm	425 mm	2,745 mm
1,200 mm	3,200 mm	575 mm	3,045 mm

07.02 eGate® Colour, eGate®

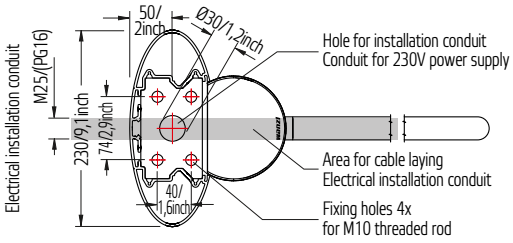
Assembly

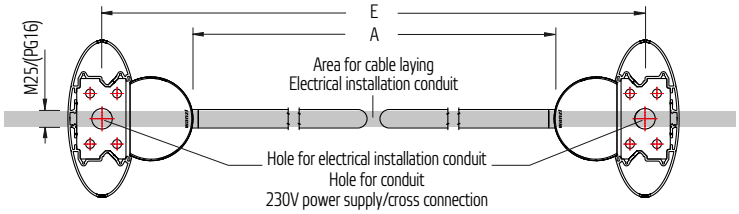
eGate uprights are installed using adhesive anchors. To do this, threaded rods are glued into the load-bearing floor. Once the connecting cables have been fed into the upright, the upright is mounted on the adhesive anchor and secured with screw nuts.

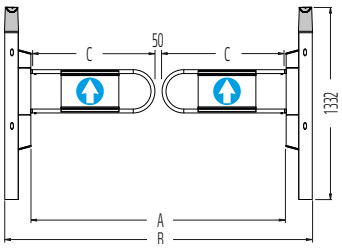
DOUBLE SYSTEM, DOUBLE-GATE
opening in both directions, features entry section

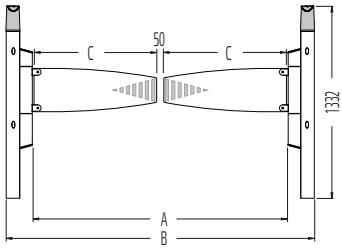
Assembly of entry/ exit section with M10x60 hexagonal screws and M10 dowels

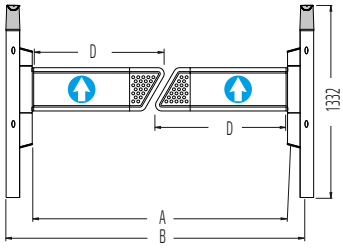
Laying **electrical installation conduits** with power supply from floor

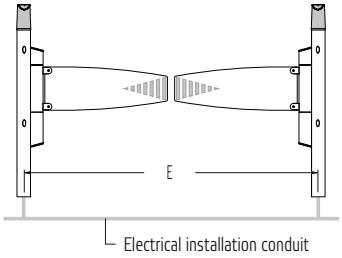






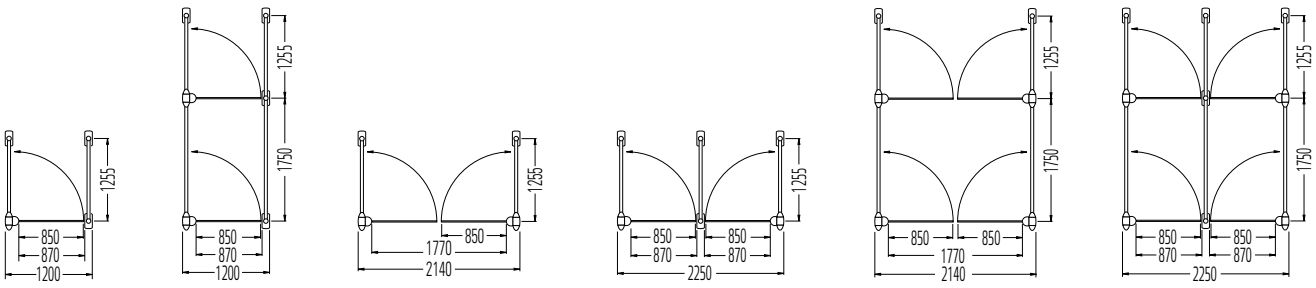






Installation dimensions for eGate entrance systems

A	B	C	D	E
Passage width	Outside measurement	Length of ESG safety glass swivel arm	Length of Promotional barrier	Axis dimensions of electrical installation conduit
1,430 mm	1,800 mm	680 mm	735 mm	1,695 mm
1,770 mm	2,140 mm	850 mm	905 mm	2,035 mm
2,030 mm	2,400 mm	980 mm	1,035 mm	2,295 mm



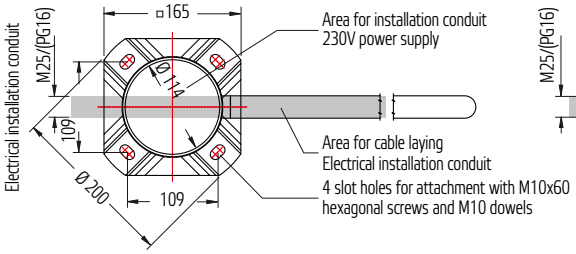
07.03 ColourGate, Technoport®

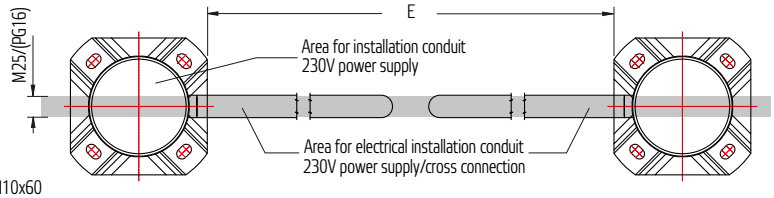
Assembly

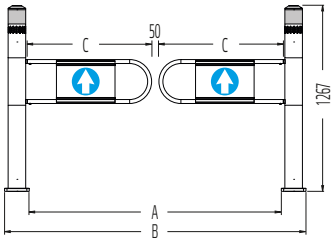
The connection cables are routed into the Technoport upright from below. The upright is then secured with screws to the dowels that have been positioned in the load-bearing floor. The base plate covers the fixing.

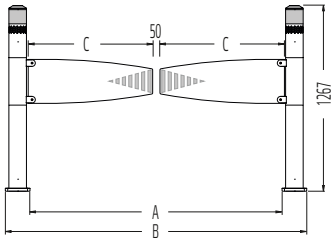
DOUBLE SYSTEM, DOUBLE-GATE, WITH CENTRAL DIVIDER
Classic swivel barrier, opening to the left or right

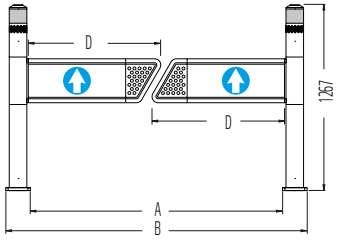
Laying **electrical installation conduits** with power supply from floor

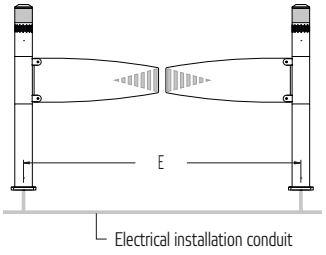






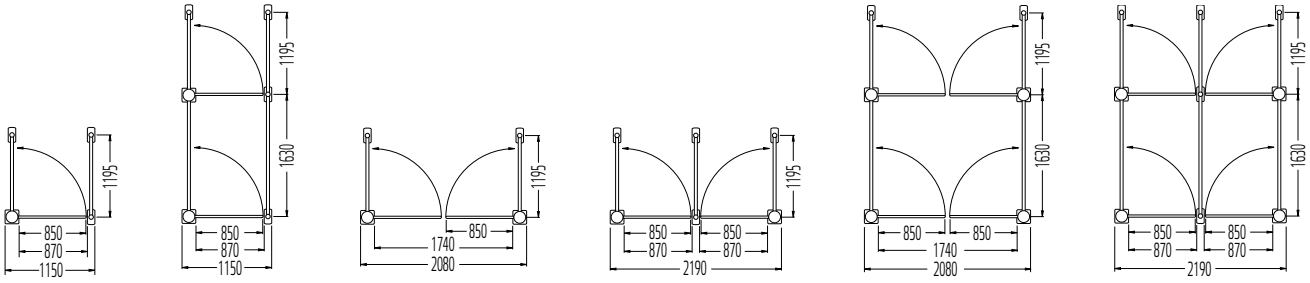






Installation dimensions for Technoport entrance systems

A	B	C	D	E
Passage width	Outside measurement	Length of swivel barrier	Length of Promotional barrier	Axis dimensions of electrical installation conduit
1,400 mm	1,740 mm	680 mm	735 mm	1,570 mm
1,740 mm	2,080 mm	850 mm	905 mm	1,910 mm
2,000 mm	2,340 mm	980 mm	1,035 mm	2,170 mm



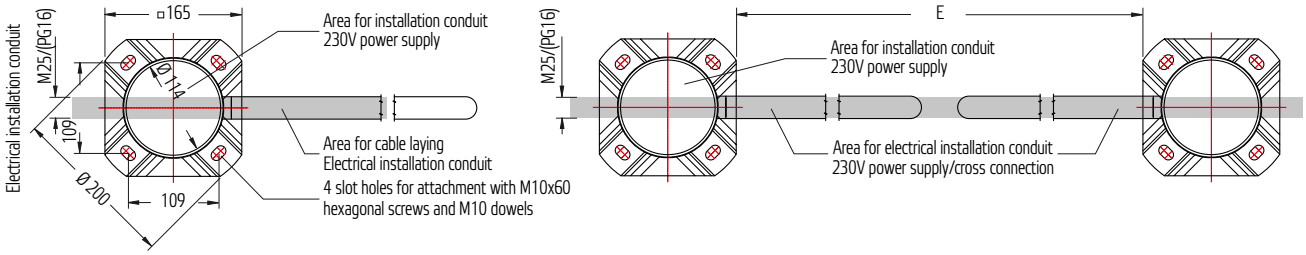
07.04 Ecoport

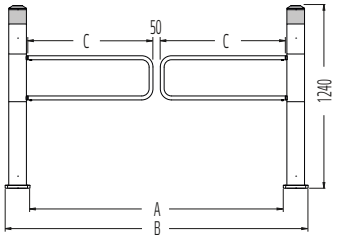
Assembly

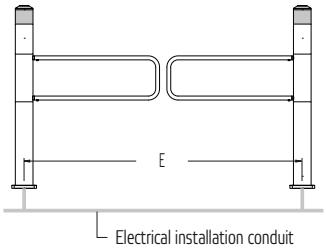
The connection cables are routed into the Ecoport upright from below. The upright is then secured with screws to the dowels that have been positioned in the load-bearing floor. The base plate covers the fixing.

SINGLE SYSTEM, DOUBLE-GATE WITH ENTRY SECTION
Classic swivel barrier, with sign, opening to the left

Laying **electrical installation conduits** with power supply from floor



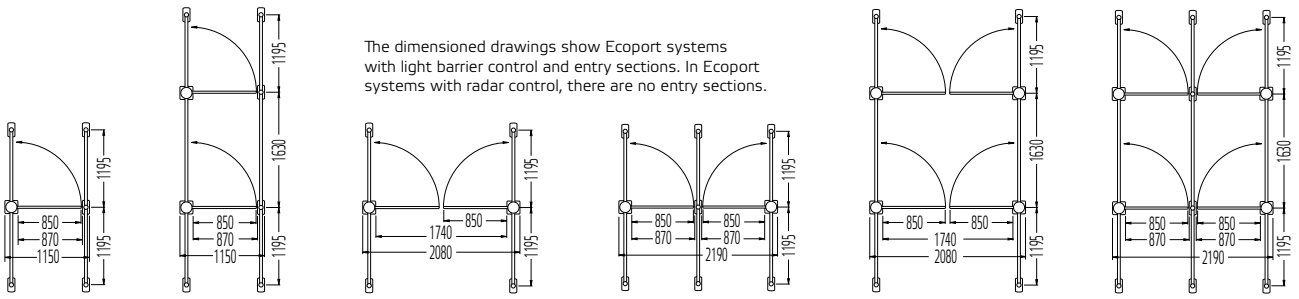




Installation dimensions for Ecoport entrance systems

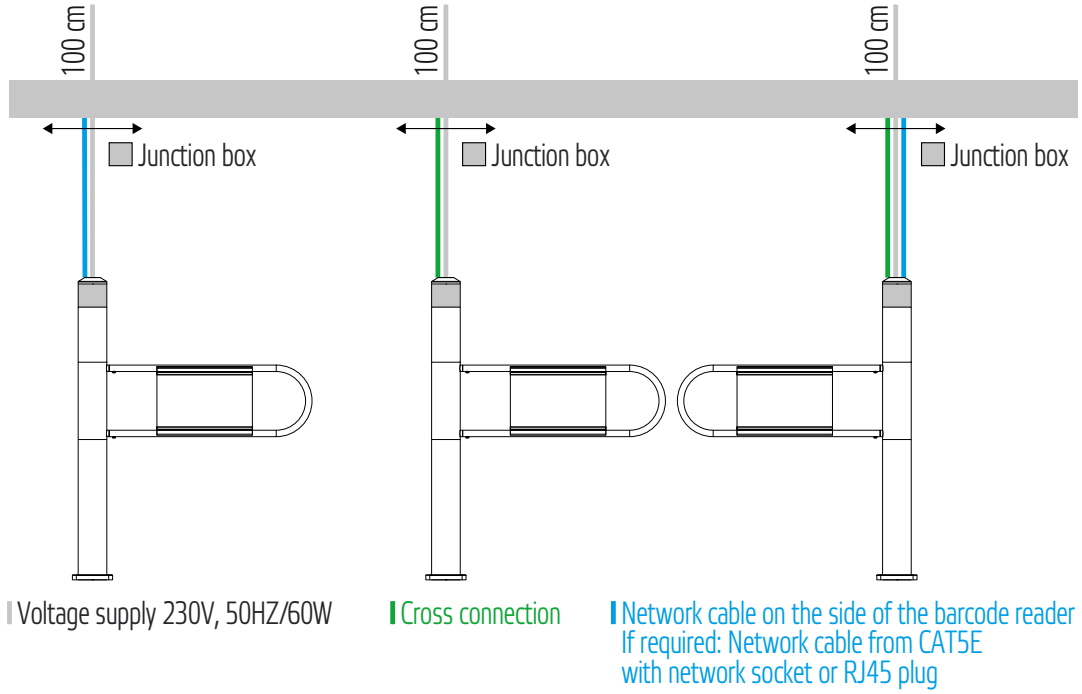
A	B	C	E
Passage width	Outside measurement	Length of swivel barrier	Axis dimensions of electrical installation conduit
1,400 mm	1,737 mm	680 mm	1,570 mm
1,740 mm	2,077 mm	850 mm	1,910 mm
2,000 mm	2,337 mm	980 mm	2,170 mm

The dimensioned drawings show Ecoport systems with light barrier control and entry sections. In Ecoport systems with radar control, there are no entry sections.

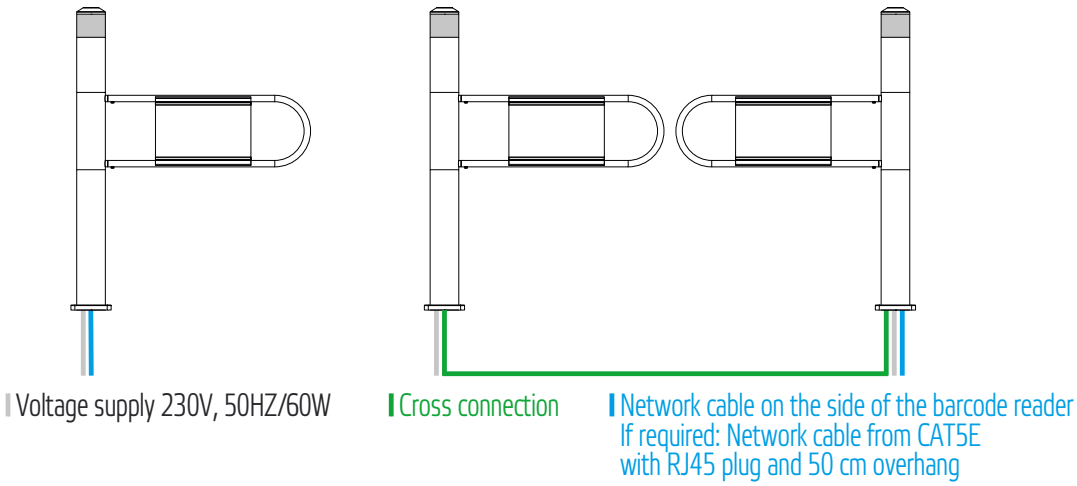


07.05 Power supply Galaxyport Pro, eGate®, eGate® Colour, ColourGate, Technoport® and Ecoport

Power supply from the ceiling



Power supply from the floor



07.06 Individual parts

Connection sleeves for connecting tubes with 40 mm diameters

Material	Plastic	
Fits	Base diameter 50 mm	Base diameter 60 mm
Order no.	23.04015.07	23.04973.07
1 unit with fixings		

Half sleeves for connecting tubes with 40 mm diameters

Material	Metal	
Fits	Base diameter 50 mm	Fixture for half sleeve
Order no.	23.17654.10/73	23.85035.10/73
1 unit with fixings		

Connection sleeves for connecting tubes with 40 mm diameters

Material	Metal						Bushing
Fits	Base diameter 50 mm	Base diameter 60 mm	Base diameter 120 mm	mGate	eGate portrait	eGate landscape	Metal
Order no.	23.07105.10/73 23.83968.09	23.07104.10/73 23.18308.09	23.09571.10/73/09	23.55293.10/73	23.78325.10/73	23.03976.10/73	on 90° connecting tube
1 unit with fixings							23.09965.10/73 00.98835.09

Wall mounts, for connecting tubes with 40 mm diameters

Material	Plastic	Metal
Fits	Straight walls	Straight walls
Order no.	23.05242.07	23.40110.10/73/09
1 unit with screw and dowel		

Wall mounts, for connecting tubes with 40 mm diameters

Material	Metal
Fits	Cash desks
Order no.	23.07107.10/73
1 unit with screw and nut	

Tube end cap

Material	Plastic			
Fits	Tube with 32 mm diameter	Tube with 40 mm diameter	Tube with 50 mm diameter	Tube with 60 mm diameter
Order no.	23.06498.07	23.06497.07	23.04014.07	23.08235.07
1 unit				

Base plate covers

Material	Metal	
Fits	Base diameter 50 mm	Base diameter 60 mm
Order no.	23.10642.10/73/09	23.04984.10/73/09
1 unit		

Set collar

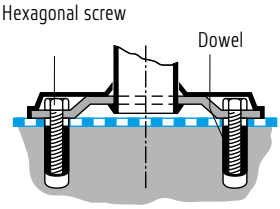
Material	Metal	
Fits	Base diameter 50 mm	Threaded pin for set collar
Order no.	00.01992.10	90.11494.50
1 unit with 3 threaded pins		For replacement needs

Order tip:

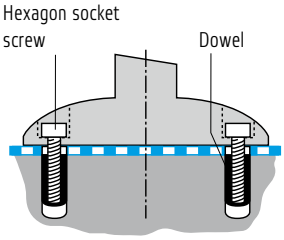
23.04015.**07**	Plastic
23.09571.**10**	High-gloss chrome-plated metal
23.09571.**50**	High-gloss galvanised metal
23.09571.**73**	Plastic powder-coated metal, please specify the colour required.
23.09571.**09**	Stainless steel

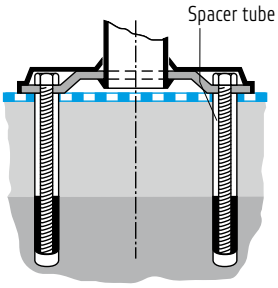
07.07 Fixing material

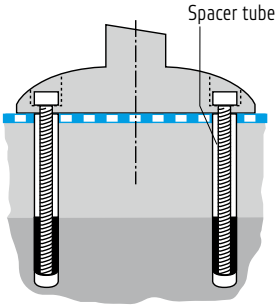
Hexagonal screw



Hexagon socket screw







Fixing material for protection systems, barrier works, customer guidance systems, etc.

for normal floor construction

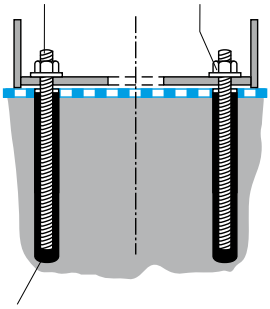
Hexagonal screw	M10x60, galvanised	M10x60, stainless steel
Prod. no. (for 1 unit)	90.11274.50	90.11274.09
4 units per base Galvanised surface		
Hexagon socket screw	M10x60, galvanised	M10x60, stainless steel
Prod. no. (for 1 unit)	90.11470.50	90.11470.09
2 for each base with stainless steel guide rails 3 for each chrome corner protector Stainless steel design		
Dowel	M10	
Prod. no. (for 1 unit)	91.07196.00	
1 unit per screw PVC		

for deep concrete layer

Hexagonal screw	M10x100	M10x120	M10x150
Prod. no. (for 1 unit)	90.11605.50	90.11277.50	90.11278.50
4 units per base Galvanised surface			
Hexagon socket screw	M10x100	M10x120	M10x150
Prod. no. (for 1 unit)	90.11634.50-0000	90.11832.50-0000	90.11833.50-0000
2 for each base with stainless steel guide rails 3 for each chrome corner protector Galvanised design			
Spacer tube	40 mm	60 mm	90 mm
Prod. no. (for 1 unit)	00.07446.00	00.07447.00	00.07448.00
1 unit per screw Galvanised surface			
Dowel	M10	M10	M10
Prod. no. (for 1 unit)	91.07196.00	91.07196.00	91.07196.00
1 unit per screw PVC			

Threaded bolt

Nut with washer



Adhesive

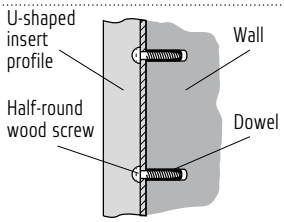
Optional: Fixing with adhesive technology

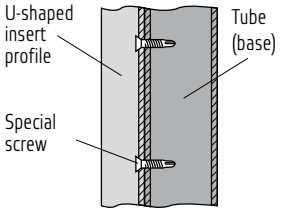
with threaded bolt for various floor compositions

Fixing set	Set complete for eGate, checkout barriers, partitions, etc.
Prod. no. (for 1 unit)	23.03657.95-0000
For a base, consisting of 4 threaded bolts M10x150 4 washers 4 nuts M10	
Adhesive for fixing set	2-component bonding grout cartridge
Prod. no. (for 1 unit)	77.92249.00-0000
Two fixing sets (8 bore holes) can be mounted with one cartridge	

Note: With underfloor heating specify the maximum permitted bore depth. Entrance system uprights are delivered as standard with fixing material.

07.08 Fixing material



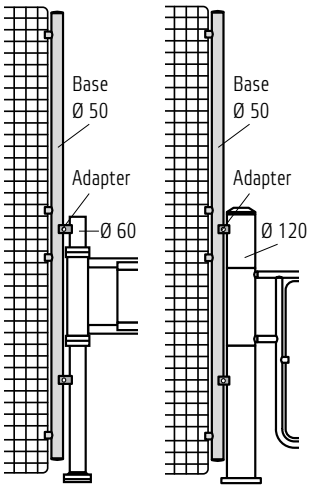


Fixing material for Railix U-shaped insert profile for wall mounting	
Kit	6 units half-round wood screws 3.5x35 DIN 96 zn, 6 units 5 mm dowels
Order no.	23.20126.00-0000
for standard fixing Half-round wood screw galvanised surface Plastic dowel	

for fixing to base with a height of 2000 mm	
Kit	7 special screws Sp3/22-6, 8-M3.9x28 GSW
Order no.	77.10951.00-0000
Self-threading screws	

Note:
Bases screws up to a height of 1500 mm 5x, up to a height of 1750 mm 6x and up to a height of 2000 mm 7x

07.09 Special bases



Bases without base plate (for Classic partition system with height 2,000 mm) for space-saving connection to barriers and entrance systems		
Prod. no. (for 1 unit)	77.61711.10-0000	
Tube diameter 50 mm, height 1,890 mm High-gloss chrome-plated finish		
Tube adapter	**Diameter of 50 to 60 mm**	**Diameter of 50 to 120 mm**
Prod. no. (for 1 unit)	77.71062.44-0000	00.20657.44-0000
Aluminium		

Note: Only when ordering new, retrofit not possible

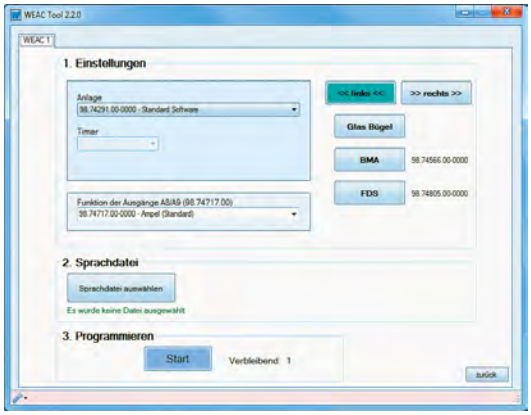
Service, anytime, anywhere

Assembly, maintenance and repair by experts

Installation exactly in line with the plan in every respect. Our experienced fitters assemble and install the systems, commission them and hand them over in ready-to-use condition – with some useful tips. This takes place exactly as planned in the drawings and, so as to comply with and not to disrupt operational processes, exactly in line with the schedule.

Maintenance. To maintain the Wanzl quality we recommend regular maintenance of all components. Ongoing maintenance ensures that the value of your assets is preserved. Ask for your own personalised maintenance plan.

Repair. An experienced team of specialists offers you short response times, a professional after-sales service and simple handling of all service requirements – across the board. Tell us what we can do for you and we will be happy to help.



REPAIR: with fast response times

Wanzl hotline for almost all situations and available practically around the clock. You can contact our hotline during normal business hours. If attempts to resolve the fault over the telephone do not lead to the required outcome, a member of our service team will immediately come out to your premises. There is a service support centre near to you.
