Upgrade for your POS: see the freshness!

■ **Would you like to redesign your POS** in order to inspire new customers with a modern design or even acquire completely new customer groups? Do you already have concrete ideas, perhaps a clear vision of how you want to turn your store into a magnet for new customers?

A new building or a complete redesign of the interior is not always advisable – not least because of the costs involved. Instead, flexibility is needed.

“Refresh” by Wanzl is pure flexibility! Through efficient planning, precise coordination between teams, and tailored space and time management, you breathe new life into your POS with an upgrade “Made by Wanzl”.

With this flexibility, we enable you to give your entire store or individual departments a new look – and without having to close the shop. In this way, you can achieve your goal without incurring additional costs due to complete or partial closures and, subsequently, even losing existing customers.

Instead, you can – without interruption – quickly benefit from the inspiring appearance of your new shopping space and its strong pull effect on the customer!

What we offer you

■ Individual consultation

Do you have a vague idea or already a concrete idea of how you want to redesign your POS? Our individual consulting services will help you move forward in both cases! With the variety of modelling and design options that we offer you, we can turn your ideas and wishes into reality.

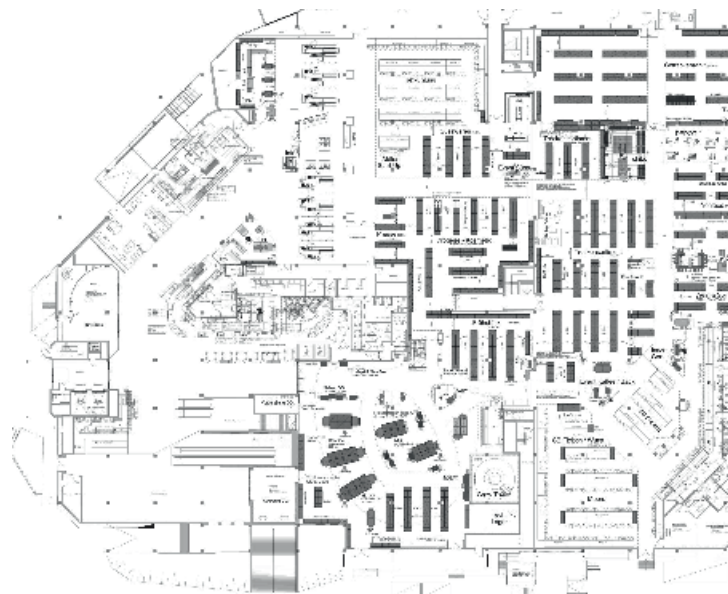

What you see is what you get!

Via 3D rendering, the customer can already view their future POS today – with an astonishingly high degree of detail. In this way, they can avoid possible planning errors at an early stage, make corrections in good time and know exactly what to expect from their “refresh” conversion.

Everything firmly under control

As an all-in-one supplier in shop fittings and conversions, we offer all services under one roof – from planning and project management to furniture construction – an invaluable advantage for the store manager! In this way, we can coordinate the planning and implementation of the conversions from a central location and significantly increase the speed of the upgrade process.

/ REFRESH

■ This is also a clear cost advantage

Our centralised management of your conversion allows us to monitor - and control - your costs from the beginning of the project right to the very end! This gives you budget security and spares you from unpleasant surprises.

And, of course: As one of the leading manufacturers in the field of retail equipment and shop fittings, you enjoy advantages when purchasing our standard components.

// From planning to implementation, we ensure that your ideas and wishes become reality! //

And ultimately, we give you peace of mind. Our extensive aftersales package ensures that maintenance and repair services are available to you at all times. And with our long-standing repurchase program, you are always on the safe side if ever you wish to replace any shopfitting components!

How we have come this far:

Seventy years of experience in equipping shops, including over thirty years in shop fittings. Take advantage of it!
